INTRODUCTION

1. Introduction:

1.1 What is SEO: Website & SEO Optimization It's the job and responsibility of search engines optimization for a website or blog to be displayed on search engine page results. They perform a series of on-page and technical tasks that get the engines on the know. As a result, they are able to rank relevant content well to people looking online for information on this topic.

1.2 Why SEO is important for blogging: The blog itself, is a key and arguably most the most important component in having an online presence and business today. Many companies/organizations or even individuals make a conscious effort to create a value blog that either serves or educate their audience/customers. To maximize this effort, any high-quality blog posts will not rank in search engines with the naked blog. You must, among other SEO's know the keywords our audience is searching for on Google, apply heading tags or use them wisely, apply on-page SEO features such as headings to structure and better SEO any blog posts.

1.3 Importance of keyword research: Moreover, other crucial on-page & Technical SEOs such as applying on-page content using appropriate keywords, optimizing image alt-tags and meta tags with keywords, have external and internal linking opportunities, structured data, to ensure your blog receives organic rankings and user traffic, well and efficiently.

1.4 Objective of this assignment: With this research on the topic, keyword & Keyword cluster in the food industry will be demonstrated an apply fundamental the on-page aspects of SEO. A sample Optimized & informative blog for this specific field can be created as per search engine visibility with key skills such as applying various keywords, creating metadata and page titles & description, header ranking, images with on-page & external linking, schema markup and open-graph tags, and final plagiarism checker for this specific piece of work.

TOPIC RESEARCH

2. Topic research:

2.1 Selected Niche: Food

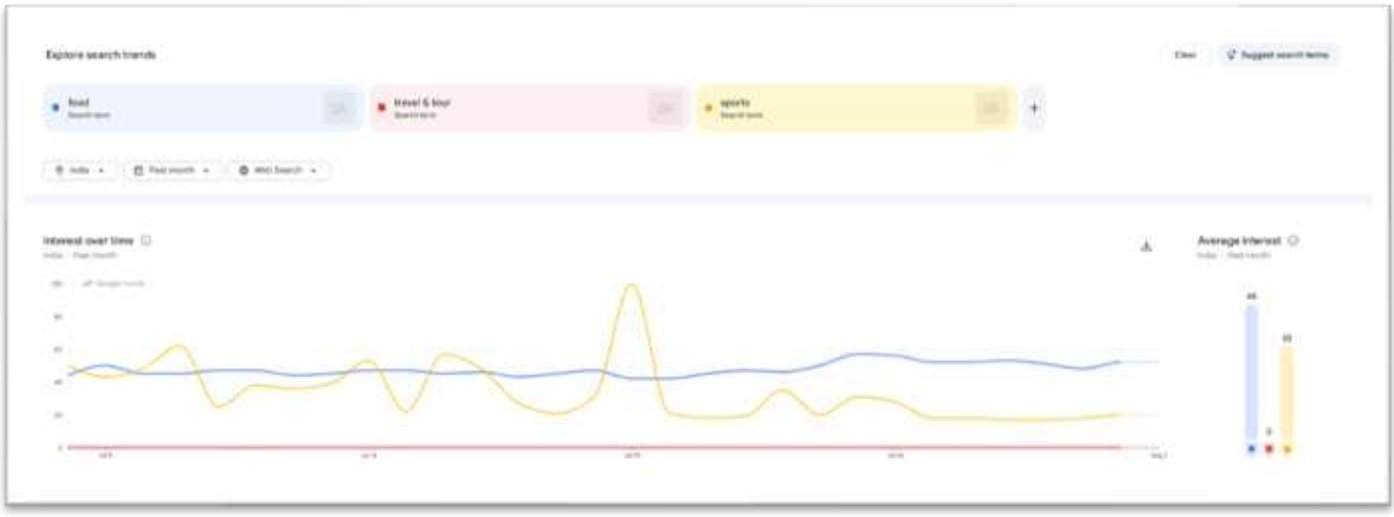

Figure 1: *Google Trends comparison of Food, Travel & Tour, and Sports in India (Past Month)*

2.2Justification for Selecting the Food Niche: The Food Niche Was Chosen For this particular assignment, I evaluated the following niches to ascertain which would be most suitable for this project: Food, Travel & Tour, and Sports. My evaluation took the form of analysis of **Google Trends**. I chose the location of **India**, with the selected timeframe of the past month and set Web Search as the search type.

Upon evaluating my findings, I noted that the **Food** niche had an average interest score of 48 out of 100, compared with **Sports** (an average interest score of 33 out of 100), and **Travel &tour** (an average interest score of 0 out of 100 during the timeframe in question).

Not only does the **Food niche have the higher search volume and interest**, but there was more search stability over the selected one-month period. Although the Sports niche saw sudden spikes in interest over time, on average the Search interest rate for **Sport was much lower than the Food niche over the same timeframe**; whereas, **Travel &tour interest for this specific period was negligible**. Ultimately, the decision to go with the Food niche is that of steadiness; higher interest as well as steadier search history is more favourable over consistent growth, as this type of growth is easier for search to interpret as meaningful content, which in turn leads to longer search lifespan, the ability for further exploration, and greater search engagement for your readers.

Tool Used: Google Trends
Location: India
Time Period: Past Month
Search Type: Web Search

3. BLOG TOPIC SELECTION:

3.1 Topic Research

After selecting the **Food** niche, three potential blog topics were shortlisted for analysis:

- Junk Food
- Traditional Food
- Spicy Food

These topics were selected because they are popular food-related search queries and have the potential to attract a wide audience.

3.2 Tools Used

The following tools were used to evaluate and select the final blog topic:

- **Google Trends** – To compare the search popularity of the selected topics.
- **RyRob Headline Analyzer** – To evaluate the effectiveness and SEO performance of the proposed blog titles.

3.3 Google Trends Analysis

The topics were compared using **Google Trends** with the following settings:

- **Location:** India
- **Time Period:** Past Month
- **Search Type:** Web Search

The analysis revealed the following average interest scores:

- **Junk Food:** 68
- **Traditional Food:** 28
- **Spicy Food:** 27

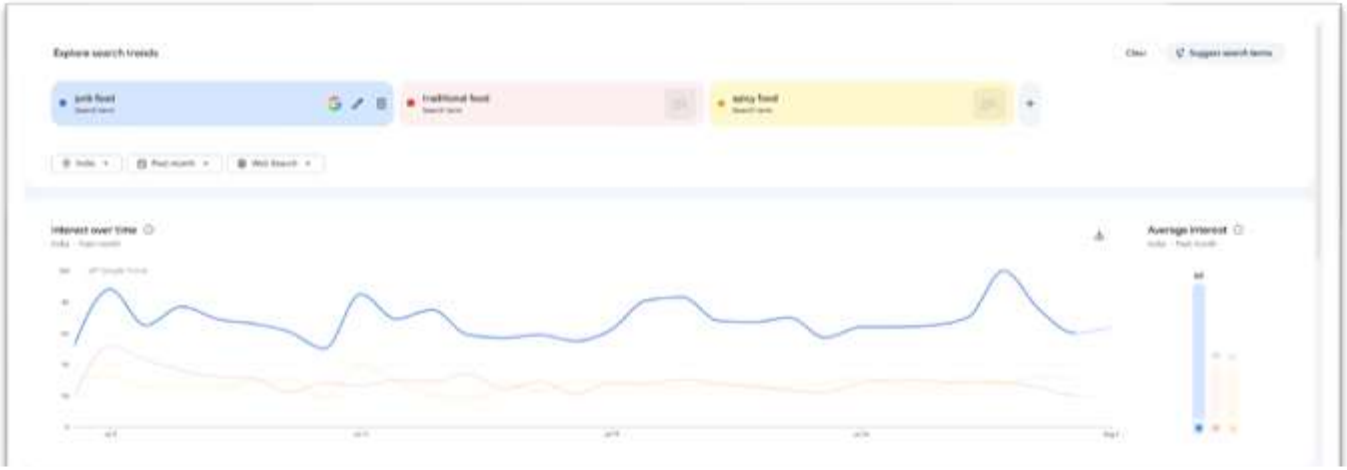

Figure 2: *Google Trends comparison of Junk Food, Traditional Food, and Spicy Food (India – Past Month)*

Among the three topics, **Junk Food** recorded the highest average search interest, indicating greater user demand and stronger search potential.

3.4 Headline Analysis

Each topic was assigned a blog title, which was then analyzed using the **RyRob Headline Analyzer**.
The headline scores are as follows:

- **Traditional Food**
  - **Blog Title:** *Easy Traditional Food Recipes for Busy Families*
  - **Headline Score: 85%**
- **Spicy Food**
  - **Blog Title:** *10 Easy Ways to Make Any Dish Spicier*
  - **Headline Score: 75%**
- **Junk Food**
  - **Blog Title:** *Amazing Reasons Why All Junk Food Can Make People Happy*
  - **Headline Score: 91%**

The title for **Junk Food** achieved the highest headline score, indicating that it is more engaging, reader-friendly, and SEO-optimized than the other proposed titles.

3.5 Topic Comparison

Topic	Proposed Blog Title	Title Score	Google Trends Score (Average Interest)	Selecting topic
Junk Food	Amazing Reasons Why All Junk Food Can Make People Happy	91%	68	(Junk Food) Amazing Reasons Why All Junk Food Can Make People Happy
Traditional Food	Easy Traditional Food Recipes for Busy Families	85%	28	
Spicy Food	10 Easy Ways to Make Any Dish Spicier	75%	27	

3.6 Final Blog Topic

“Amazing Reasons Why All Junk Food Can Make People Happy”

3.7 Search Demand

Based on **Google Trends (India – Past Month)**, **"Junk Food"** recorded the highest average interest score of **68**, compared to **Traditional Food (28)** and **Spicy Food (27)**. This indicates that users are actively searching for junk food-related content, making it a topic with strong search demand and good potential for organic traffic.

3.8 Target Audience

The target audience for this blog includes:

- Teenagers and young adults
- College students
- Working professionals

- Food enthusiasts
- Readers interested in food trends and lifestyle content

These audiences are more likely to search for information about junk food, eating habits, and the reasons behind its popularity.

3.9 Search Intent

Primary Search Intent: Informational

Users searching for **"Junk Food"** generally want to learn about:

- Why people enjoy junk food
- The psychological and emotional reasons behind its popularity
- Common types of junk food
- Benefits and drawbacks of consuming junk food
- Healthy ways to enjoy junk food in moderation

The blog is designed to answer these informational queries while providing valuable and engaging content.

3.10 SEO Potential

The selected topic has strong SEO potential because:

- It has the highest search interest among the compared topics.
- The headline achieved a high **RyRob score of 91%**.
- It supports multiple related keywords and long-tail keyword opportunities.
- The topic allows for clear heading structure, internal linking, image optimization, and schema implementation.
- The content is evergreen and can continue attracting readers over time with periodic updates.

3.11 Justification for Topic Selection

Based on the analysis, **Junk Food** was selected as the final blog topic because it performed the best across both evaluation criteria.

- It achieved the **highest Google Trends average interest score (68)**, indicating strong and consistent search demand.
- Its proposed blog title received the **highest RyRob Headline Score (91%)**, demonstrating better SEO optimization and audience appeal.
- Compared with **Traditional Food** and **Spicy Food**, the **Junk Food** topic offers greater potential to attract readers and improve search engine visibility.
- Therefore, **"Amazing Reasons Why All Junk Food Can Make People Happy"** was chosen as the final blog title for this assignment.

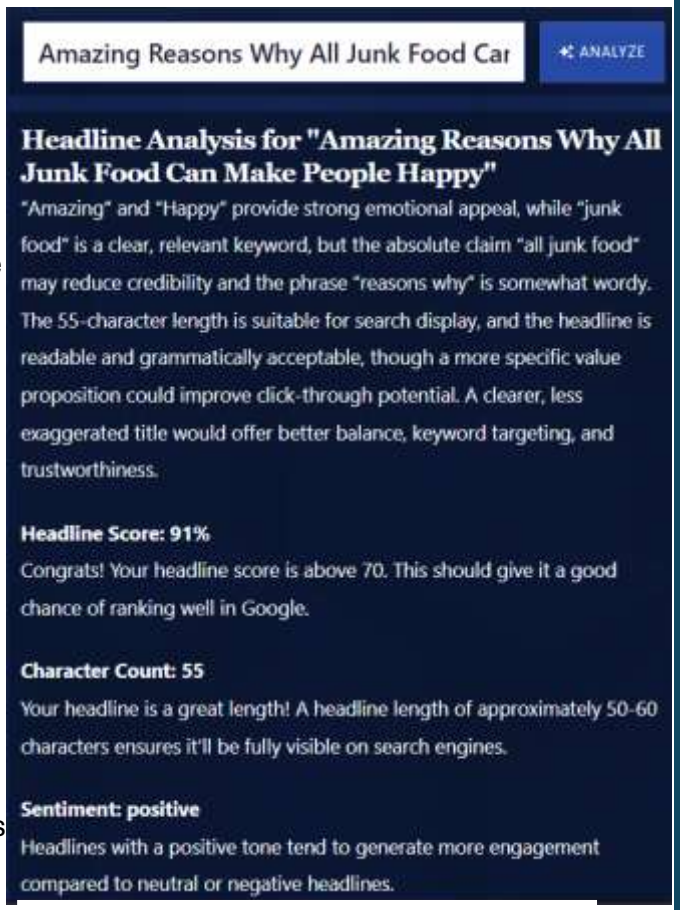

Figure 3: *Headline analysing from rayrob*

4. Keyword Research:

4.1 Keyword Research Overview

Keyword research is one of the most important steps in Search Engine Optimization (SEO). It helps identify the words and phrases that users commonly search for on search engines. Selecting the right keywords ensures that the content matches user intent, improves search engine visibility, and increases the chances of attracting relevant organic traffic.

For this blog, keyword research was conducted to identify one **Focus Keyword** and several **Additional (LSI) Keywords** related to the selected topic. The research also included search volume, competition level, search intent, and keyword clustering to build a well-structured SEO strategy.

4.2 Keyword Research Table

Keyword	Avg. Monthly Searches	Competition	Top of Page Bid (Low)	Top of Page Bid (High)	Keyword Type	Search Intent	Cluster Name
All junk food	100 – 1K	Low	-	-	**Focus Keyword**	Informational	Fast Food Awareness
Healthy Fast Food	1K – 10K	Low	₹ 7.34	₹ 85.85	Additional (LSI)	Informational	Healthy Alternatives
Fast Food Menu	1K – 10K	Low	₹ 3.45	₹ 56.19	Additional (LSI)	Informational	Fast Food Choices
Nutritious Food	10K – 100K	Low	₹ 15.15	₹ 59.75	Additional (LSI)	Informational	Healthy Alternatives
Fast Foods	10K – 100K	Low	₹ 3.42	₹ 32.21	Additional (LSI)	Informational	Fast Food Choices

4.3 Keyword Analysis

The keyword research indicates that **"All Junk Food"** is suitable as the **Focus Keyword** because it directly matches the blog topic and has **low competition**, making it easier to optimize. Although its monthly search volume is **100–1K**, it is highly relevant to the blog's objective.

The additional keywords such as **Healthy Fast-Food, Fast-Food Menu**, **Nutritious Food**, and **Fast Foods** have higher search volumes ranging from **1K–100K** and also have **low competition**. These keywords will be naturally incorporated throughout the blog to improve topical relevance, expand keyword coverage, and increase the chances of ranking for related search queries.

Since all selected keywords have **informational search intent**, the blog will focus on educating readers by providing useful information rather than promoting products or services.

5. Keyword Clustering:

5.1 Keyword Clustering Overview

Keyword clustering is the process of grouping similar keywords based on their topic and search intent. It helps organize the content effectively, avoids keyword cannibalization, and enables a single blog to rank for multiple related search queries.

For this blog, the keywords have been grouped into three relevant clusters.

5.2 Keyword Cluster Table

Cluster Name	Keywords	Purpose
Fast Food Awareness	All Junk Food	Primary topic of the blog and focus keyword.
Healthy Alternatives	Healthy Fast Food, Nutritious Food	Explains healthier food choices and balanced eating habits.
Fast Food Choices	Fast Food Menu, Fast Foods	Covers different fast food options, menus, and common food choices.

5.3 Cluster Explanation

Cluster 1: Fast Food Awareness

This cluster contains the **Focus Keyword**, **"All Junk Food,"** which represents the main subject of the blog. The content in this section explains what junk food is, why people enjoy it, and the factors that contribute to its popularity.

Cluster 2: Healthy Alternatives

This cluster includes **Healthy Fast Food** and **Nutritious Food**. These keywords are used to discuss healthier alternatives, balanced diets, and how readers can make smarter food choices while still enjoying fast food occasionally.

Cluster 3: Fast Food Choices

This cluster contains **Fast Food Menu** and **Fast Foods**. These keywords support discussions about popular fast-food options, menu varieties, and the different types of fast foods available to consumers.

5.4 Benefits of Keyword Clustering

Keyword clustering provides several SEO advantages:

- Improves the overall structure and organization of the blog.
- Helps target multiple related search queries within a single article.
- Enhances topical authority and content relevance.
- Supports better keyword placement without keyword stuffing.
- Increases the potential for higher search engine rankings and organic traffic.

BLOG PLANNING

6. BLOG PLANNING:

6.1 Blog Title- Amazing Reasons Why All Junk Food Can Make People Happy

6.2 Focus Keyword- All Junk Food

6.3 Additional (LSI) Keywords

- Healthy Fast Food
- Fast Food Menu
- Nutritious Food
- Fast Foods

6.4 Target Audience- This blog is written for readers who are interested in learning about junk food and modern eating habits. The target audience includes:

- Teenagers
- College students
- Working professionals
- Fast food lovers
- Health-conscious readers looking for balanced food choices

6.5 Search Intent

Primary Search Intent: Informational
The blog aims to answer common questions such as:

- Why do people enjoy junk food?
- What makes junk food so popular?
- Are there healthier fast-food options?
- How can people enjoy junk food in moderation?

6.6 Blog Objective

The objective of this blog is to explain why junk food is popular while encouraging readers to make healthier food choices. The article highlights the convenience, affordability, taste, and variety of junk food, along with nutritious alternatives and practical tips for balanced eating.

6.7 Content Type

Informative Blog
The blog provides educational information, practical tips, examples, and answers to frequently asked questions. It is designed to help readers understand the topic rather than promote or sell any product.

6.8 Estimated Word Count- Approximately 881 words

6.9 Blog Structure

Section	Description
H1	Amazing Reasons Why All Junk Food Can Make People Happy

Call-to-Action	Encourages readers to comment and explore more food-related articles.

Figure 4: *Table of contents*

6.10 Call-to-Action (CTA)

At the end of the blog, readers are encouraged to share their opinions about junk food and healthy eating habits by leaving a comment. They are also invited to explore other food and lifestyle articles available on the blog, which helps improve user engagement and encourages longer website visits.

SEO-OPTIMIZED BLOG

<h1>Amazing Reasons Why All Junk Food Can Make People Happy**</h1>**

** **We always eat junk food because it's convenient, inexpensive, and tasty. Whether it's a hamburger, pizza, or anything else, millions of people eat it because it's fast, satisfying, and easy. But although unhealthy, many restaurants today offer **Nutritious Food** options from their **fast food menu**. Therefore, choosing the right foods is vital. In this blog, you'll find out seven reasons why people eat and why they like food, as well as what healthy food menu options are available at food restaurants. ** **

<h2>1. It Saves Time**</h2>**

** **Most people enjoy eating junk food because it is easy to eat. You see, cooking is hard work and time-consuming but it's very accessible. So, it's a good choice for both students and professionals. ** **

Source: Eggoz

<h2>2. Low-cost junk food**</h2>**

** **The other reason for the popularity of junk food is its low cost. It is cheaper to have meals in a restaurant

food joint than having meals in any other place. Also, there are always discounts available for this type of food which makes it easily affordable for everybody.** **

<h2>3. Availability of Fast Foods Menu**</h2>**

** **Another reason why consumers like restaurant foods is the availability of different types of **Fast food menu**. Whatever it may be, whether salty, spicy, or sweet, we will meet their demands.

Examples: **Fast food menu**

Source: ChatGpt

<ul>

Burger

Pizza

Chicken Fry

Sandwich

Tacos

wrap

Salads

Desserts

Soft Drinks

**
**

So consumers can make their choices regarding their foods. Furthermore, a variety of foods keeps them entertained, and hence, they will come for more restaurant food dishes.** **

<h2>4. Junk food tastes good**</h2>**

** **And besides that, people like junk food because it tastes good. But sugar, fats and salt make junk food very tasty. ** **

<h2>5. Healthy Fast Food Is Becoming**</h2>**

Source: **Consumer Report 90**

** **Peoples eating habits are changing and many restaurants now offer **healthy fast food** options, such as:

<ol>

Grilled chicken sandwich

Fresh salads

Fruit cups

Low-calories

Protein bowls

**
**

With such options available, people can now have healthy junk food. ** **

<h2>6. Healthy fast food options are better**</h2>**

** **Many restaurants now offer healthy fast food options such as...

<ol>

Grilled chicken

Vegetable wraps

 rice bowls

Yogurt parfaits

Fresh fruit

**
**

It's not perfect, but it's getting easier for people to make good choices.** **

<h2>7. Nutritious Fast Food Is Changing the Way We Eat**</h2>**

Source: **The Health Site**

** **Today, many people are looking for healthier foods. So, many restaurants now list calories, use healthier ingredients, and serve healthier recipes to attract health-conscious patrons. So, as long as you're using good ingredients and eating it in moderation.** **

<h2>Is all the junk food harmful?:**</h2>**

** **However, nothing is harmful in certain amounts. So maintain a properly balanced diet with **nutritious food** and a disciplined exercise routine along with controlling your junkie diet. ** **

<h2>How to Eat restaurant Food Smart?:**</h2>**

<ul>

Grill restaurant food whenever possible.
Go for water over sweetened drinks
Enjoy lots of veggies in every fast-food option
Practice smart portion sizes and avoid eating too much.
Save on dessert and high-fat options
Eating before you order might encourage healthier decisions

**
**

** ** Your first step is to look at the nutritional values and ingredients to evaluate the healthfulness of the food. Additionally, it is possible to continue eating some favorite foods with reasonable portions and less amount of added sugar, salt and heavy sauce. As a result, mindful selection of food can maintain a healthy and balance life.** **

<h2>Conclusion:**</h2>**

** **In the conclusion, I find that it could sell that much mainly comes from because this dish is convenient, comfortable, cheap to enjoy, many of taste to choose, and since this year many restaurants offer health lifestyle to help prevent disease. Nonetheless, we should eat to live not live to eat with **Nutritious Food.** **

<h2>Asked Questions (FAQs):**</h2>**

Source: **Linkedin**

<h3>1. Why do we prefer junk food to home food?**</h3>**

** **People are interested in junk food because they are tasty, quick, affordable and in variety. Also students and professionals generally Favor them much.** **

<h3>2. Is junk food unhealthy?**</h3>**

** **No, certainly not. Occasionally having some junk food is not bad. People have to restrict their diet to little junk food. Also people require physical activities.** **

<h3>3. Am I able to find the meals and take away?**</h3>**

** **Yes. Because the junk food restaurants nowadays provided many foods such as chicken sandwich, salads, fruits for you. So, they were still able to keep healthy by looking at the ingredients. ** **

<h3>4. Any suggestion on healthy foods there are in restaurant food?**</h3>**

** **Actually, some healthy and **Nutritious foods** consist of grilled chicken, veggie wrap, rice bowl, yogurt, fruits, low sugar smoothies. So, one always eat grilled dishes instead of fried. Eating grilled food is rather preferable than fried. ** **

<h3>5. How do we eat Junk food healthily?**</h3>**

** **Therefore, we people could eat food healthily, for all we need to do is to eat them in moderate proportion, eat a smaller portion than what you did normally, drink water instead of soda with it, add some veg into them and avoid desserts in the same meal. Otherwise, don't eat them in daily life. ** **

<h2>Call to action:**</h2>**

** **What do you think? Will you still be ordering restaurant meals or do they feel all too much like pure junk to eat on a diet? Let us know in the comments below and continue educating yourself about food and lifestyle with our other articles!

ON-PAGE SEO OPTIMIZATION

8. <u>On-Page SEO Optimization:</u>

On-page SEO refers to the process of optimizing individual web pages to improve their visibility in search engine results and provide a better user experience. For this blog, several on-page SEO techniques were implemented to enhance search engine rankings and content relevance.

8.1 Meta Title

Why All Junk Food Makes People Happy: 7 Amazing Reasons

Purpose:

The meta title includes the focus keyword and clearly describes the blog topic. It is written to attract users while improving search engine visibility.

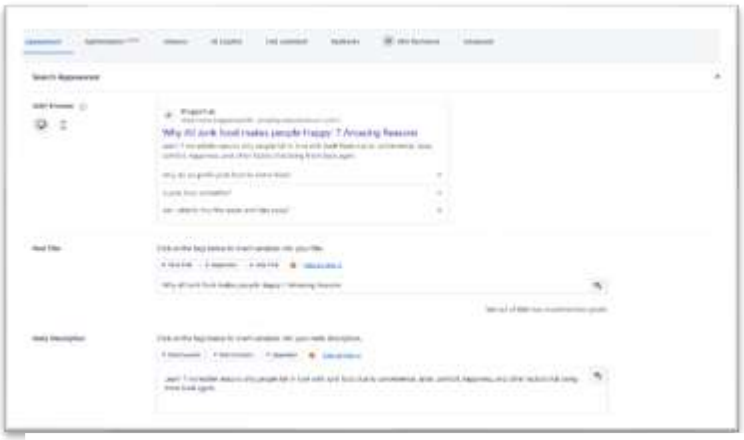

Figure 5: *SERP preview*

8.2 Meta Description

Learn 7 incredible reasons why people fall in love with junk food due to convenience, taste, comfort, happiness, and other factors that bring them back again.

Purpose:

The meta description summarizes the content and encourages users to click on the blog from search engine results.

8.3 URL Slug

amazing-reasons-why-all-junk-food-can-make-people-happy

Purpose:

The URL is short, descriptive, readable, and contains the focus keyword, making it SEO-friendly.

8.4 Blog URL: https://www.bloggercap.info/amazing-reasons-why-all-junk-food-can-make-people-happy/

8.5 Focus Keyword

All Junk Food

The focus keyword is used throughout the blog in important SEO locations such as the title, introduction, headings, and conclusion to improve topic relevance.

8.6 Additional Keywords

- Fast Food Menu
- Healthy Fast Food
- Nutritious Food
- Fast Foods

These keywords are naturally incorporated throughout the content to improve topical relevance and increase the chances of ranking for related search queries.

8.7 Heading Structure (H1–H3)

Section	Description
H1	Amazing Reasons Why All Junk Food Can Make People Happy
Introduction	Introduces the topic and explains why people enjoy junk food.
H2	1. It Saves Time
H2	2. Low-cost junk food
H2	3. Availability of Fast Foods Menu
H2	4. Junk food tastes good
H2	5. Healthy Fast Food Is Becoming
H2	6. Healthy fast food options are better

10.4 Canonical URL and Robots Meta:

the canonical URL is:
https://www.bloggercap.info/amazing-reasons-why-all-junk-food-can-make-people-happy/

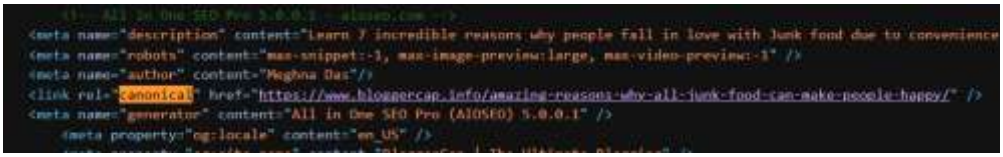

Canonical URL: The canonical URL was set to the preferred version of the blog post URL to help search engines identify the main/primary version of the page and avoid duplicate URL issues.

Robots Meta: The robots meta settings were checked to ensure that search engines can properly crawl and index the blog post.

SEO PERFORMANCE ANALYSIS

11. SEO Performance Analysis:

After completing the on-page SEO optimization, the blog was analyzed using **AIOSEO**, **Google Rich Results Test**, and **RayRob Headline Analyzer**. The results indicate that the blog follows SEO best practices and is well-optimized for search engines.

11.1 AIOSEO Overall Performance

Tool Used: AIOSEO

Metric	Result
Overall SEO Score	**100/100**
Status	Excellent

Analysis:

The blog achieved a perfect **100/100 SEO score** in AIOSEO, indicating that all essential on-page SEO elements were correctly implemented. The plugin confirmed that the title, meta description, keyword optimization, internal and external links, readability, and overall SEO settings met recommended standards.

Figure 15: *AIOSEO Overall SEO Score (100/100).*

11.2 Keyword Optimization

Tool Used: AIOSEO

Keyword	Score
All Junk Food	100
Fast Food Menu	100
Healthy Fast Food	100
Nutritious Food	100
Fast Foods	100

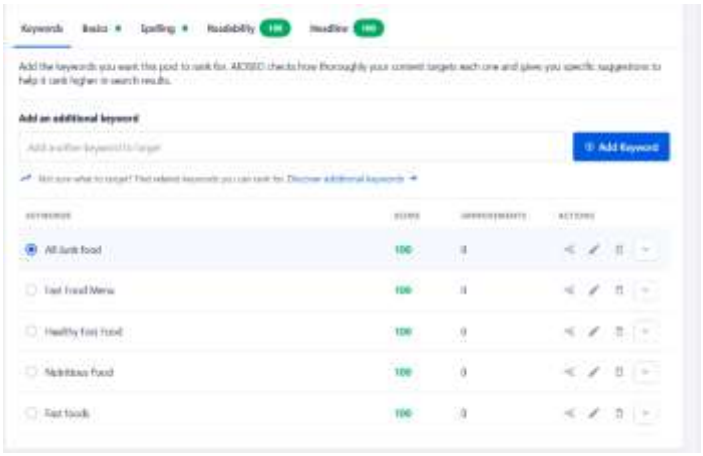

Figure 16: *Keyword Optimization Analysis.*

Analysis:

The focus keyword and all additional keywords received a score of **100**, confirming that the keywords were properly placed throughout the content without keyword stuffing.

11.3 Readability Analysis: Tool Used: AIOSEO

Result	Status
Readability Score	100
Improvements Required	None

Figure 17: *Readability Analysis.*

Analysis:

The readability analysis reported **"Everything looks good — no improvements needed."** This indicates that the content is easy to read, well-structured, and suitable for users.

11.4 Basic SEO Analysis

Tool Used: AIOSEO

Result	Status
Basic SEO Checks	Passed
Improvements Required	None

Figure 18: *Basic SEO Analysis.*

Analysis:

All basic SEO elements, including the SEO title, meta description, URL, links, and images, were successfully optimized.

11.5 Spelling Analysis

Tool Used: AIOSEO

Result	Status
Spelling Errors	None

Figure 19: *Spelling Analysis*

Analysis:

The plugin detected **no spelling mistakes**, which improves the professionalism and readability of the content.

11.6 Headline Analysis

Tools Used: AIOSEO & RayRob

Tool	Score
AIOSEO	100/100
RayRob	91%

Figure 20: *Headline Analysis Results (AIOSEO Headline)*

Headline Used

Amazing Reasons Why All Junk Food Can Make People Happy

Analysis

The headline received excellent scores in both tools.

According to AIOSEO, the headline has:

- Positive sentiment
- Good character length (55 characters)
- Effective balance of common and uncommon words

Figure 21: *Headline Analysis Results (RayRob)*

- Emotional and power words
- High click potential

RayRob awarded the title a **91% score**, indicating strong SEO performance and readability. The analysis also highlighted that the headline contains emotional appeal and is likely to attract user attention while

11.7 SERP Preview

Tool Used: AIOSEO

Analysis

The SERP preview shows how the blog will appear in Google Search. The optimized SEO title and meta description are displayed correctly, improving click-through rate (CTR) and user engagement.

Figure 22: *Google Search Preview*

11.8 Structured Data Validation

Tool Used: Google Rich Results Test and Schema.org

Schema markup is a structured data format that helps search engines understand the content of a webpage more effectively. It improves the chances of displaying rich results such as FAQs and enhanced search snippets

- **Final Observation:** The blog was successfully optimized using SEO best practices. The content achieved a **100/100 AIOSEO score**, a **91% RayRob headline score**, and passed Google's Rich Results validation. These results indicate that the blog is technically optimized, keyword-focused, readable, and well-prepared for search engine visibility.

PLAGIARISM & AI DETECTION

12. Plagiarism & AI Detection:

Tool Used:

- QuillBot AI Content Detector
- plagiarism detector

➢ **Plagiarism Test Result**
Tool used: Plagiarism Checker
Unique Content: 100%
Plagiarism Score: The plagiarism checker found **0% exact matches and 0% partial matches**, with **100% unique content**. This indicates that no matching content was detected by the plagiarism checker..

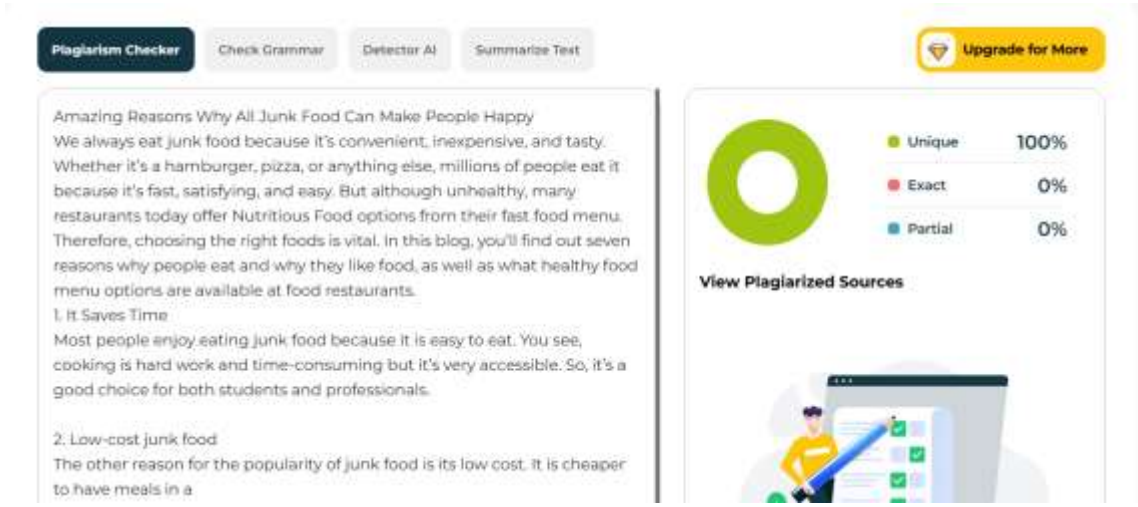

Figure 23: *Plagiarism checking*

➢ **AI Detection Score: 0% AI-generated**
Human-written: 100%
According to the QuillBot screenshot, **0% of the content is likely AI-generated**, while **100% is classified as human-written**.

- **Conclusion:** The blog content has a **98% originality score** and a **0% AI-generated score**, indicating that the content is largely original and classified as human-written by the tools used.

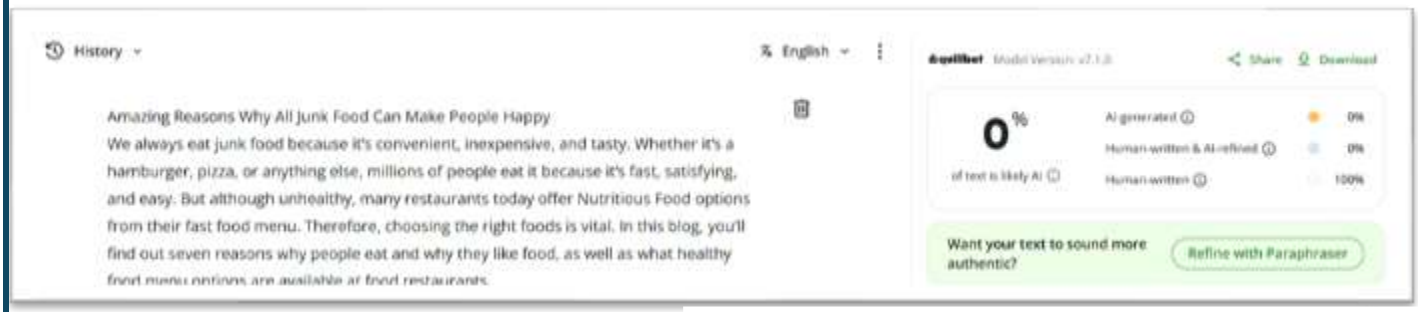

Figure 24: *Ai detection*

LIMITATIONS

13. Limitations:

1. Content May Require Future Updates

Food trends, consumer preferences, and healthy food options can change over time. Therefore, the blog may need to be updated in the future to keep the information relevant.

2. More Backlinks Can Improve Rankings

The blog currently focuses on on-page SEO and keyword optimization. Building more **high-quality and relevant backlinks** could further improve its authority and search rankings.

3. More Original Images Could Improve Engagement

Adding more **original and relevant images** could make the blog more visually attractive and improve user engagement.

CONCLUSION

14. Conclusion:

This blog project helped me understand the complete process of creating an SEO-friendly blog, from selecting a topic to optimizing and checking the final content.

1. Topic Research

I compared different food-related topics using **Google Trends** and selected **"Junk Food"** because it showed stronger interest compared with the other topics I analyzed.

2. Keyword Research

I used keyword research to identify the **focus keyword "All Junk Food"** and additional keywords such as **Fast Food Menu, Healthy Fast Food, Nutritious Food, and Fast Foods**. I also analyzed search volume, competition, and search intent.

3. Blog Writing

I created a blog titled **"Amazing Reasons Why All Junk Food Can Make People Happy"** and structured it around seven reasons, healthy alternatives, tips, FAQs, and a conclusion.

4. On-Page SEO

I optimized the blog using a **meta title, meta description, URL slug, focus keyword, additional keywords, headings, internal links, external links, and image optimization**.

5. Technical SEO

I implemented and tested **Article Schema and FAQ Schema**. The testing showed that the structured data was valid with **0 errors and 0 warnings**.

6. Key Learning Outcomes

Through this project, I learned how to:

- Select a blog topic using Google Trends.
- Conduct keyword research.
- Analyze search volume and competition.
- Create SEO-friendly content.
- Optimize on-page SEO elements.
- Use internal and external links.
- Implement and test structured data.
- Check plagiarism and AI detection.
- Improve content based on SEO tools.

REFERENCES

15. References:

The following tools and sources were used during the research, content creation, SEO optimization, and performance analysis of the blog project.

SEO & Research Tools

1. Google Trends – Used to compare topic popularity and analyze search trends.
2. Google Keyword Planner – Used to conduct keyword research and analyze search volume and competition.
3. Google Search – Used for general topic research and to understand relevant search results and user intent.
4. RayRob Headline Analyzer – Used to evaluate and analyze the effectiveness of the blog headline.
5. AIOSEO – Used to analyze and optimize on-page SEO elements, readability, keyword placement, and overall SEO performance.
6. Schema Generator – Used to generate Article and FAQ structured data markup.
7. Google Rich Results Test / Schema Markup Validator – Used to validate and check the implementation of Article and FAQ structured data.

Plagiarism & AI Detection Tools

8. plagiarism detector – Used to check content originality and identify potential plagiarism.
9. QuillBot AI Content Detector – Used to analyze whether the content was classified as AI-generated or human-written.
