Acknowledgement

I would like to express my sincere gratitude to **Webskitters Academy** for providing me with the opportunity to work on this Digital Marketing Project on **YummyBee**.

I am thankful to **Mr. Arjun Singh (Faculty)** and **Ms. Bidisha Das (Mentor)** for their valuable guidance, support, and encouragement throughout the project.

This project has enhanced my practical knowledge of digital marketing strategies, including SEO, competitor analysis, social media marketing, and paid advertising.

Finally, I would like to thank everyone who contributed to the successful completion of this project.

About Yummy Bee

Yummy Bee is an Indian health-focused food and café brand founded in 2022 by Sandeep Jangala and Sonia Lamba. Operating under VLOGS Food Private Limited, the company specialises in healthier food alternatives, including sugar-free and gluten-free desserts, cakes, wholesome meals, snacks, and beverages.

The brand aims to combine taste, quality, and convenience by offering food through its cafés, cloud kitchens, and online ordering platform. With a focus on ingredient-conscious products and customised cakes, Yummy Bee serves customers looking for alternatives to conventional food and desserts. Through its digital ordering platform and physical outlets, Yummy Bee aims to make its products more accessible while developing its presence in India's evolving health-focused food market.

Business Understanding

YummyBee is a food-focused business that aims to serve customers with convenient, tasty, and affordable food options. Its business depends on understanding customer preferences, maintaining food quality, competitive pricing, and effective promotion.

The target customers may include **students, young professionals, families, and other consumers** looking for convenient and enjoyable food options. YummyBee can use both **offline and digital marketing channels**, such as social media, promotional offers, customer reviews, and word-of-mouth marketing, to attract and retain customers.

The business needs to continuously monitor **customer preferences, competitors, pricing, food trends, and market demand** to remain competitive and grow.

YummyBee
EAT• GUILT FREE

Business Objectives

The main objective of **YummyBee** is to provide tasty, hygienic, and affordable food products to customers while building a strong and recognizable food brand. The business aims to:

- Offer good-quality food products at reasonable prices.
- Satisfy customers through taste, quality, and service.
- Build strong brand awareness in the target market.
- Increase sales and expand the customer base.
- Use digital marketing and social media to reach more customers.
- Develop customer loyalty through consistent quality and attractive offerings.
- Expand the business into new locations and product categories in the future.

YummyBee
EAT• GUILT FREE

Business challenges

Web Skitters ACADEMY
A National Award Winning Company

YummyBee may face several challenges in operating and expanding its business:

1. **Strong Competition**
2. **Maintaining Consistent Quality**
3. **Customer Retention**
4. **Price Sensitivity**
5. **Raw Material Costs**
6. **Digital Marketing Competition**
7. **Changing Customer Preferences**
8. **Delivery and Service Issues**
9. **Brand Awareness**
10. **Business Expansion**

YummyBee
EAT• GUILT FREE

Business USP

“Guilt-Free Food Without Compromising on Taste”

- **Health-Focused Products:** Sugar-free, gluten-free, and maida-free options.
- **Fresh Ingredients:** Focus on freshly prepared food without preservatives.
- **Wide Product Range:** Healthy meals, cakes, desserts, snacks, and beverages.
- **Customisation:** Personalised cakes and meal plans.
- **Omnichannel Convenience:** Cafés, cloud kitchens, online ordering, and food delivery platforms.

YummyBee
EAT• GUILT FREE

SWOT analysis

- Competition from established food brands
- Rising ingredient and operating costs
- High commissions on delivery platforms
- Changing customer preferences

- Distinctive health-focused positioning
- Diverse food and dessert menu
- Multiple sales channels
- Customised offerings

- Short shelf life of fresh products
- Higher costs of specialised ingredients
- Dependence on consistent product quality
- Limited geographic reach compared with national chains

- Expand into new cities
- Improve direct website sales
- Grow through digital marketing
- Introduce new healthy snacks and beverages

YummyBee
EAT• GUILT FREE

Online Presence & Digital Footprint of Yummy Bee

- **Official Website:** yummybee.in showcases the brand, its products, and store locations.
- **Online Ordering:** order.yummybee.in enables customers to browse products and place food orders online.
- **Social Media:** Instagram helps promote products, offers, and brand awareness.
- **Food Delivery Platforms:** Yummy Bee is listed on Swiggy and Zomato, expanding its online reach.
- **Geographic Footprint:** Its digital presence primarily serves customers in Hyderabad, with multiple store listings and location based delivery.

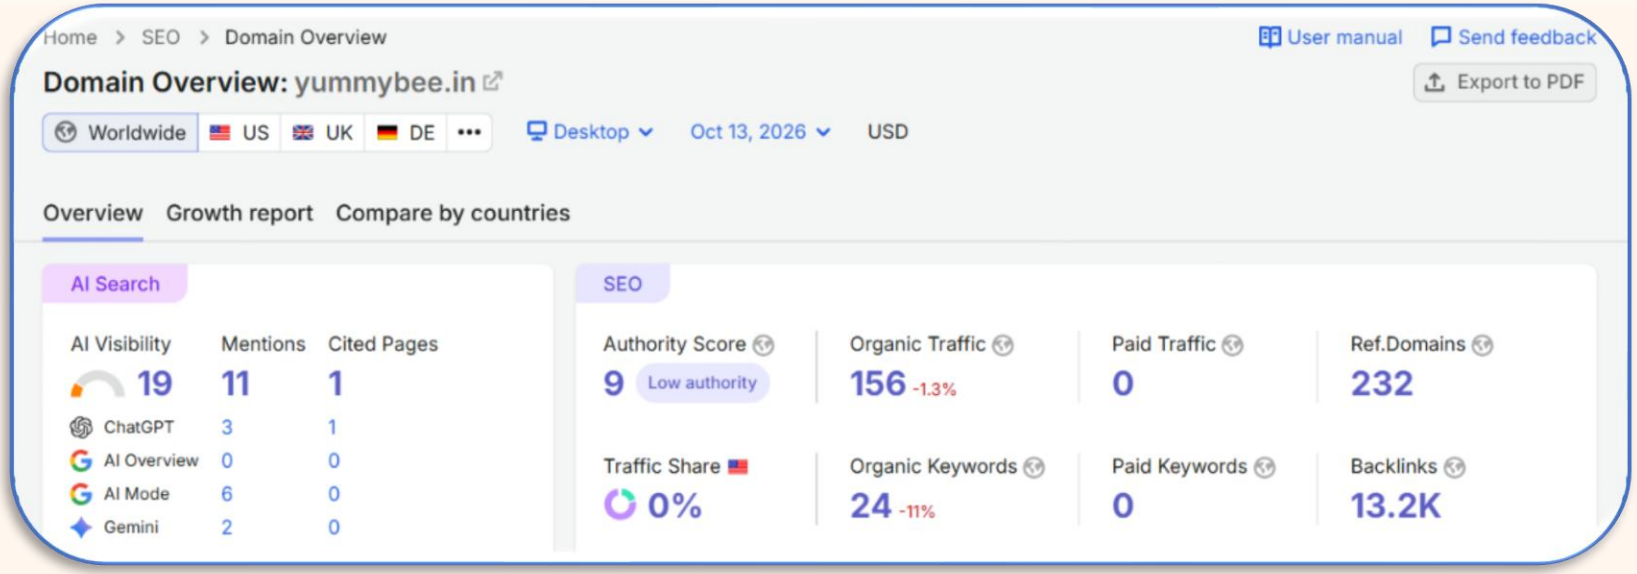

Overall: Yummy Bee uses its website, online ordering system, social media, and food delivery platforms to build brand awareness, attract customers, and drive online sales.

Our website: https://yummybee.in/

YummyBee
EAT• GUILT FREE

Current scenarios

Yummybee has low domain authority and limited organic search visibility. It receives an estimated 156 organic visits and ranks for 24 organic keywords. Despite having 13.2K backlinks, its SEO performance needs improvement. The website has zero paid search traffic, so improving keyword rankings, local SEO, content quality, and backlink quality should be the main priorities.

Recommended next steps

1. Target keywords such as healthy food in Hyderabad, sugar-free cakes, and gluten-free desserts.
2. Optimize product pages, titles, meta descriptions, and image alt text.
3. Improve Google Business Profile listings and location-specific pages.
4. Audit backlinks for relevance and quality.
5. Track organic traffic, keyword rankings, conversions, and Google Search Console performance monthly.

Test: 04 October 2026

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

Overall SEO Audit

YummyBee
EAT• GUILT FREE

Domain authority score

DA Score: 15/100
Linking Root Domains: 50
Spam Score: 3%
Ranking Keywords: 0

Source: Moz Link Explorer

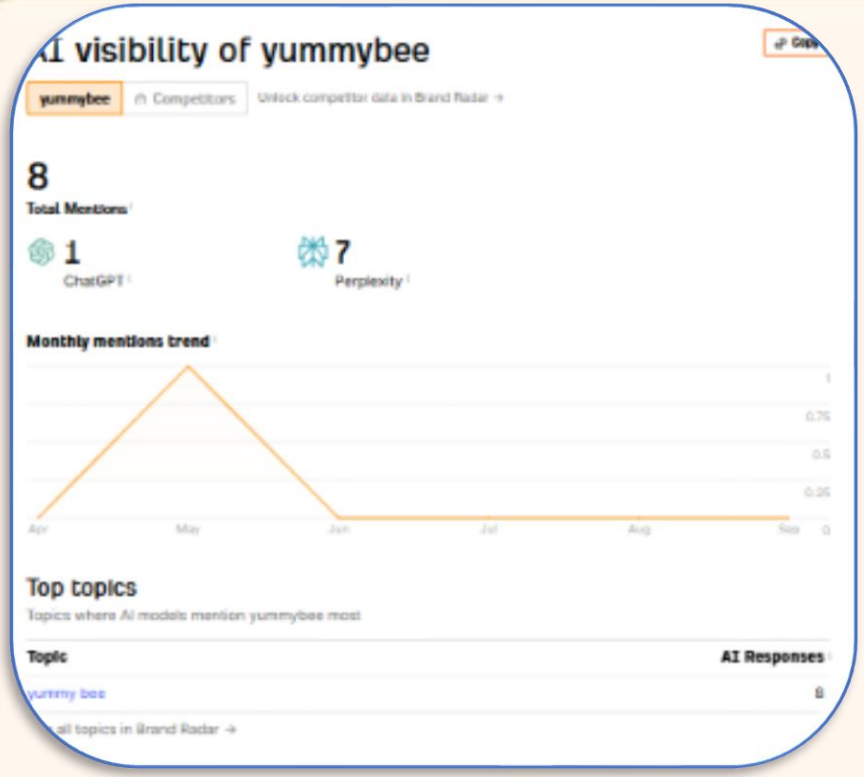

YummyBee has a relatively low Domain Authority, indicating an opportunity to strengthen its overall website authority and organic ranking potential. The website has **50 linking root domains** and a **3% Spam Score**, which is considered low. Improving the quality and relevance of backlinks, along with stronger on-page and technical SEO, can help build domain authority over time.

Test: 04 October 2026

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

AI visibility

Overall AI Visibility

- Total AI mentions: 8
- ChatGPT mentions: 1
- Perplexity mentions: 7
- The report shows YummyBee being mentioned more frequently on Perplexity than on ChatGPT.

Key Observation: YummyBee has some visibility in AI-generated responses, supported by its website and third-party sources. However, the reported mentions are limited, and visibility differs across AI platforms.

Recommended Improvements

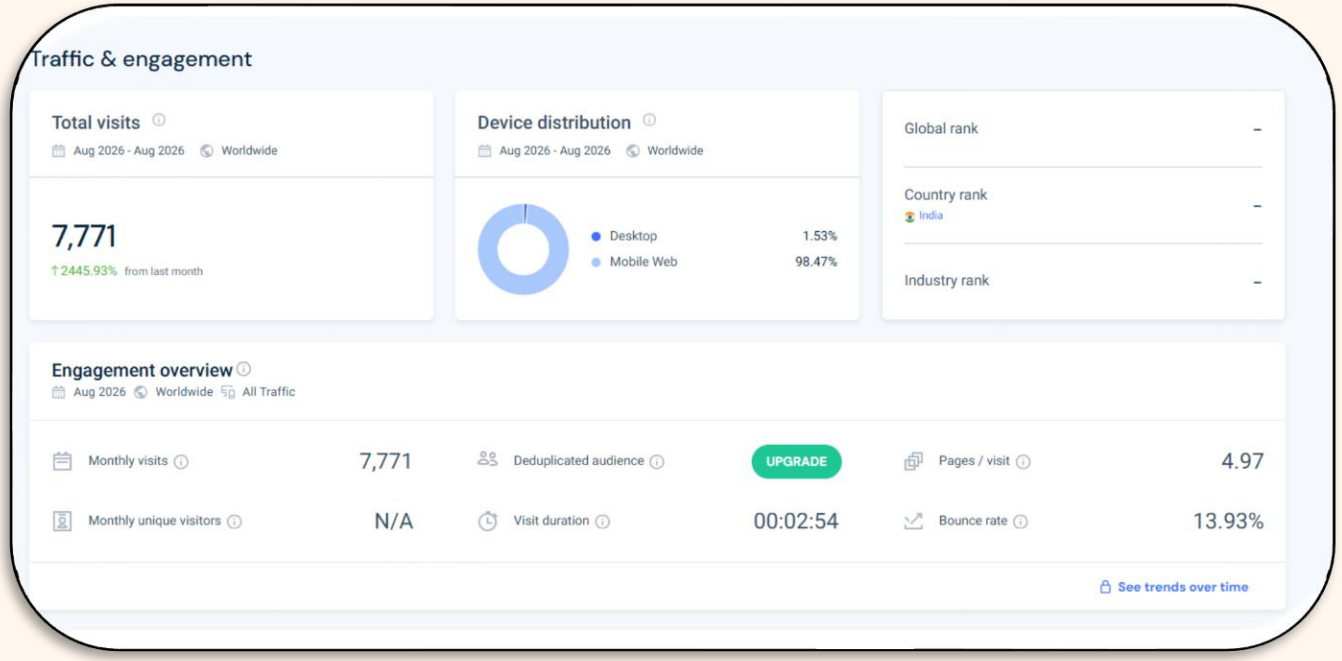

- Publish helpful, authoritative content on the website.
- Strengthen brand mentions through relevant, credible publications.
- Improve structured data and organization information.
- Create clear FAQs about products, ingredients, locations, and delivery.
- Monitor brand mentions across ChatGPT, Perplexity, and other AI search platforms.

Website organic traffic analysis

- **Organic Traffic:** 90 visits
- **Traffic Value:** $2.5
- **Top Market:** India (100%)
- **Top Keywords:** Yummy Bee JP Nagar, Yummy Bee Jubilee Hills, and Yummy Bee Sainikpuri
- **Top Page:** order.yummybee.in

Key Insight: Organic traffic primarily comes from branded, location-specific searches. Targeting more non-branded keywords can help Yummybee improve search visibility and attract new customers.

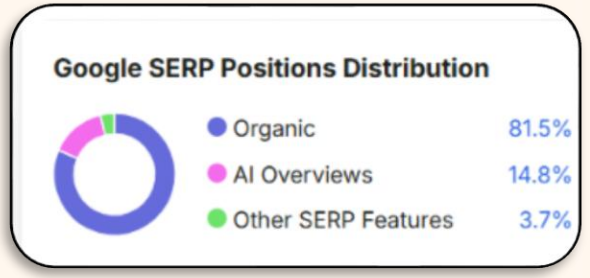

Source: Ahrefs

Test: 04 October 2026

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

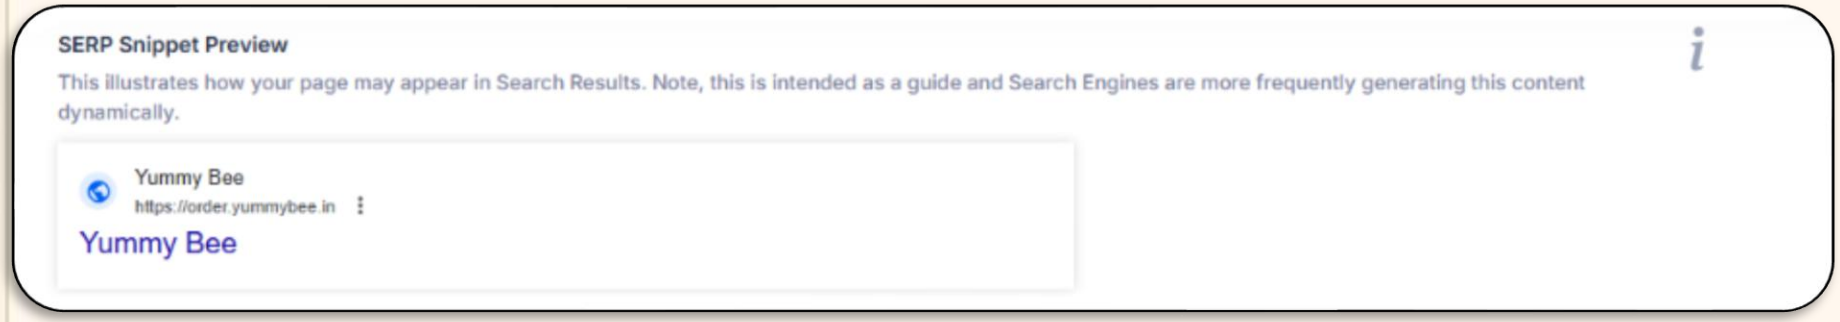

Website SERP analysis

Source: Similarweb, Semrush

- **SERP visibility is limited** across several search features.
- The website has **some keyword presence**, but many SERP features are not being captured.

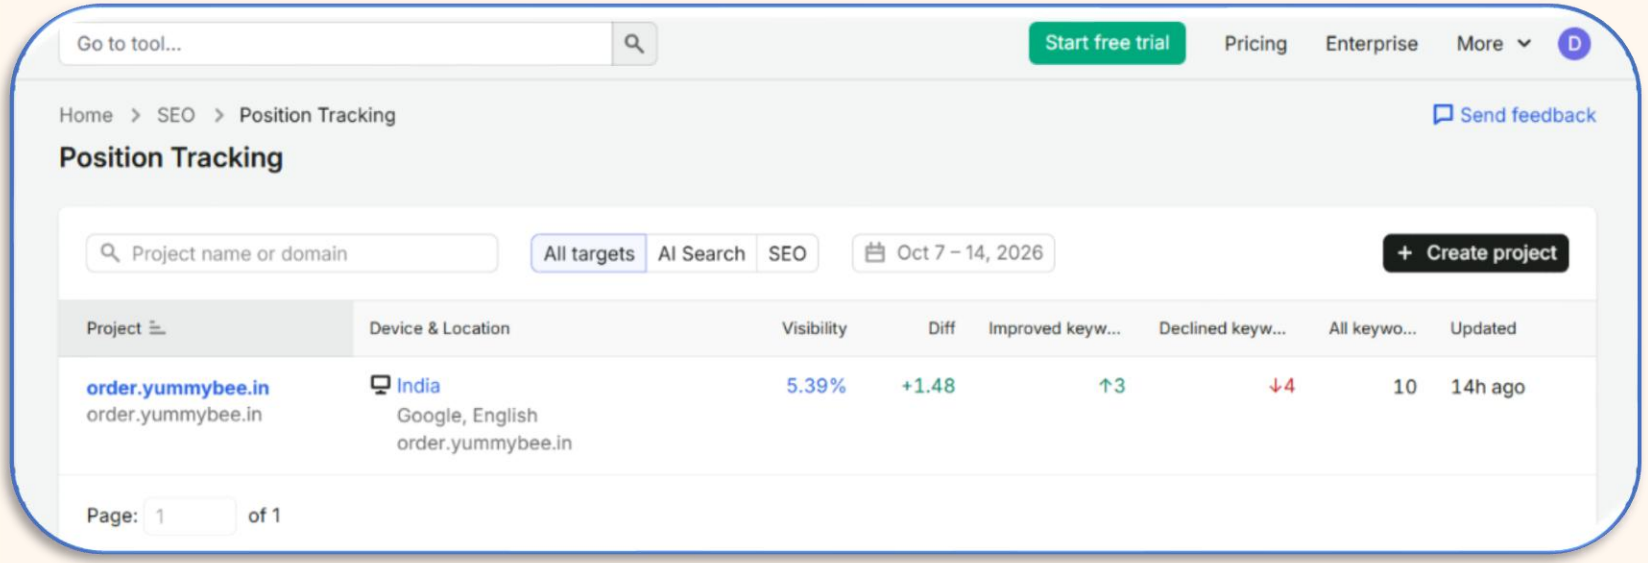

- The SERP snippet mainly displays the **brand name "Yummy Bee"**, with limited additional information.
- **Recommendation:** Optimize title & meta description and target relevant keywords to improve SERP visibility and opportunities for rich results.

Test: 04 October 2026

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

Website position tracking

- **Search Visibility:** 5.39%
- **Visibility Change:** +1.48
- **Improved Keywords:** 3
- **Declined Keywords:** 4
- **Total Tracked Keywords:** 10
- **Target Market:** India

Key Insight: Yummybee's search visibility is improving, but more keywords have declined than improved. Further keyword optimization and content improvements are needed to strengthen Google rankings.

Recommended Actions:

- Optimize homepage title tags, meta description, and headings.
- Target relevant non-branded and local keywords.
- Improve content relevance and internal linking.
- Monitor keyword ranking changes regularly.

Page indexing analysis

1. Indexing Overview

- The main website URL is listed with a domain score of 472 and 56,313 backlinks.
- HTTP and HTTPS www versions are also listed separately in the report.
- Additional URLs contain tracking parameters, such as ?source=indiadesktop.com and ?srsltid=....

2. Key Observations

- Multiple URL variations appear in the indexed-pages report.
- Tracking-parameter URLs may create duplicate URL variations if not handled correctly.
- The report displays a large backlink count for the main URL; backlink quality and relevance should be reviewed separately.

3. Recommended Actions

- Check whether HTTP and HTTPS/www versions redirect to the preferred URL.
- Verify canonical tags on important pages.
- Ensure tracking parameters do not create unnecessary indexable duplicates.
- Review Google Search Console to confirm which URLs Google has actually indexed.

Broken link analysis

Source: Ahrefs

- **Website URL:** https://yummybee.in/
- **Broken Links on Website:** 0
- **Broken Links to Website:** 0

Key Insight: Yummybee has no reported broken links, indicating a healthy link structure. Regular link audits can help maintain website usability and SEO performance.

SEO Impact: Having no detected broken links supports a smoother user experience and helps visitors navigate the website without encountering broken destinations.

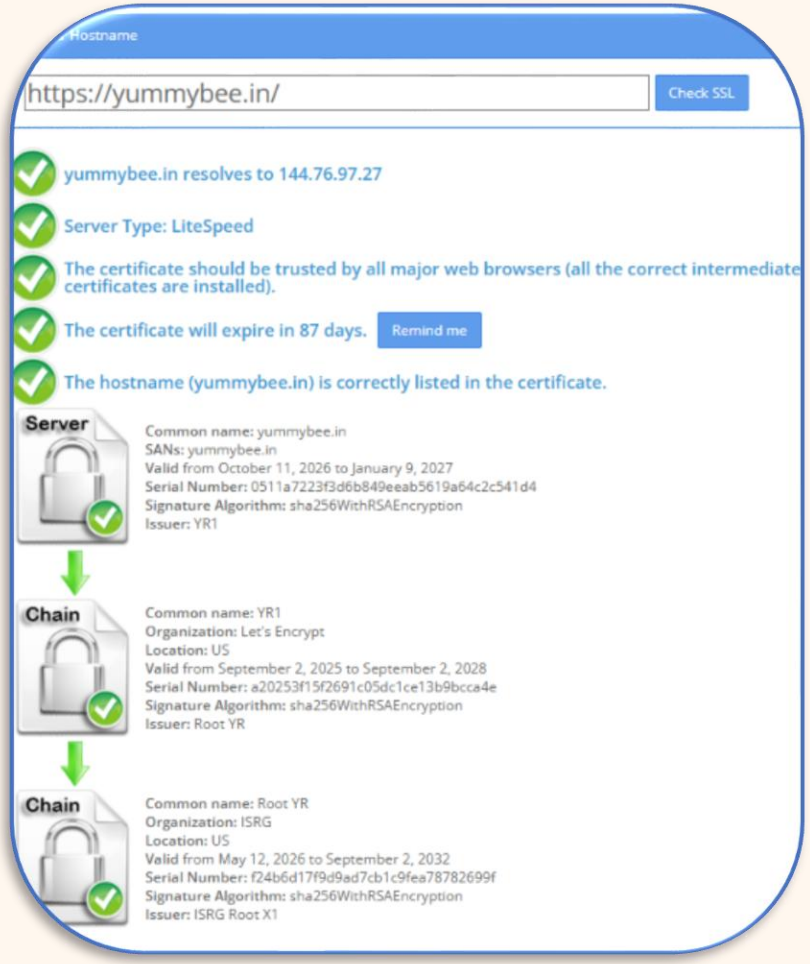

Recommendation: Continue checking internal and external links regularly to maintain website quality and usability.

Test: 04 October 2026

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

Source: SSL checker

Website Url: https://yummybee.in/
SSL Status: Valid and trusted
Server Type: LiteSpeed
Domain Resolution: Successful
Certificate Expiry: January 9, 2027
Hostname Verification: Passed

Key Insight: Yummybee has a valid SSL certificate, ensuring secure HTTPS communication. Regular certificate renewal is recommended to maintain website security and user trust.

Recommendation

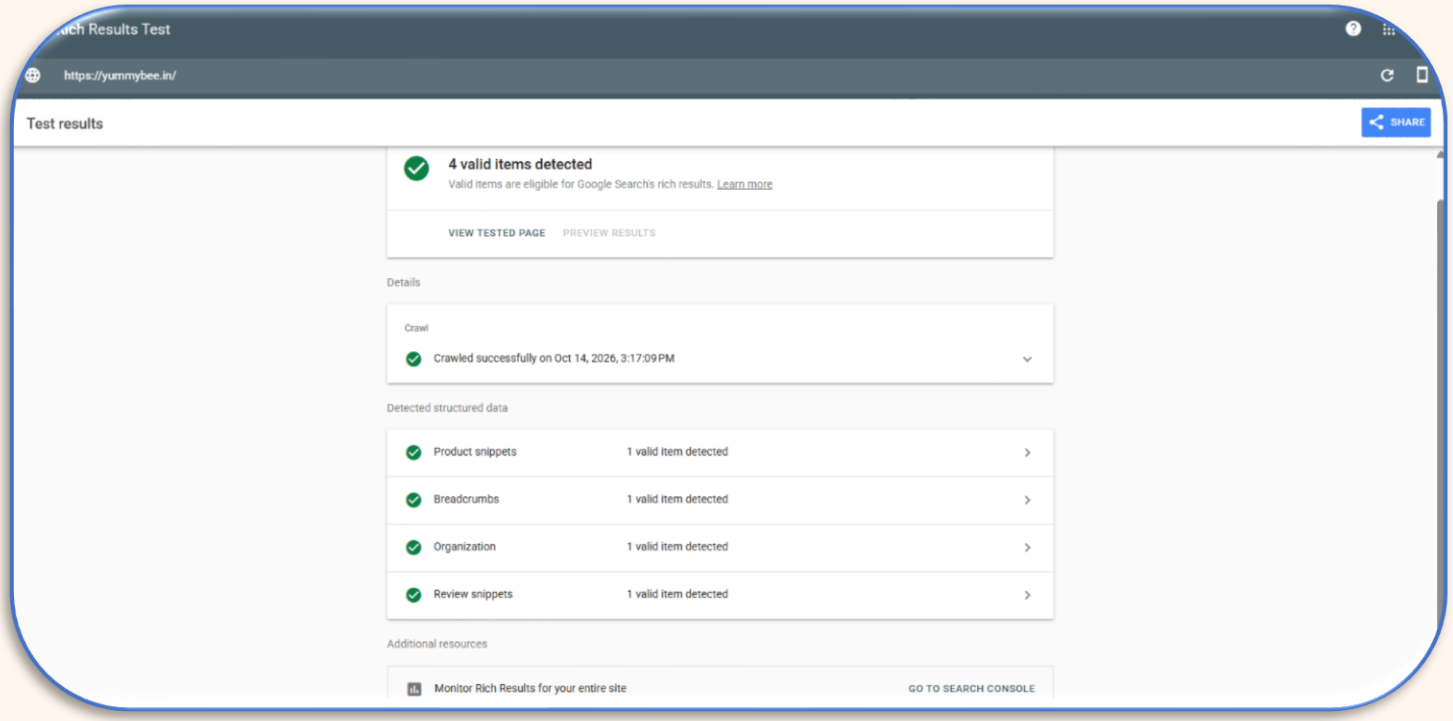

- Monitor SSL certificate expiry and renew it before expiration.
- Keep the web server and security configuration updated.
- Recheck HTTPS redirects and ensure all website resources load securely.

Test: 04 October 2026

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

AMP analysis

Audit Result: The tested URL is not an AMP page and does not link to an AMP page.

- **Website URL:** https://yummybee.in/
- **AMP Status:** Not an AMP page
- **Article Structured Data:** No article structured data detected

Key Observation: The tested page does not use Accelerated Mobile Pages (AMP). The audit also did not detect Article structured data on this URL.

Recommendations

- Prioritize mobile page speed and Core Web Vitals rather than implementing AMP solely for SEO.
- Add relevant structured data where appropriate, such as Organization, Product, or Breadcrumb markup.
- Use Article structured data only for eligible article or blog pages.
- Validate structured data using Google's Rich Results Test.

Conclusion: The page is not AMP-enabled, and no Article structured data was detected. Neither finding alone means the page is failing SEO requirements.

Keyword consistency analysis

Web Skitters ACADEMY
A National Award Winning Company

Keyword Consistency

Your page's main keywords are not distributed well across the important HTML Tags.

Your page content should be focused around particular keywords you would like to rank for. Ideally these keywords should also be distributed across tags such as the title, meta and header tags.

KEYWORD	TITLE	META DESCRIPTION TAG	HEADINGS TAGS	PAGE FREQUENCY
telangana	✗	✗	✗	8
open hours	✗	✗	✗	3
monday friday	✗	✗	✗	3
yummy bee	✓	✗	✗	2
delivery location	✗	✗	✓	2
good food	✗	✗	✓	2
jubilee hills	✗	✗	✗	2
ground floor	✗	✗	✗	2

Source: Seoptimer

Issue: Main keywords are not properly distributed across important HTML tags.

Most keywords are **missing from the Title, Meta Description, and Headings**.

"Yummy Bee" appears in the title but is missing from the meta description and headings.

- Keywords like **"delivery location," "good food," and "yummy bee"** should be strategically included in relevant SEO elements.

Recommendation: Optimize the **Title, Meta Description, H1/H2 headings, and page content** with relevant target keywords naturally.

Test: 04 October 2026

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

Page speed check mobile [1/2]

Web skitters ACADEMY
A National Award Winning Company

Source: Page speed insight

- **Performance Score:** 35/100 – Needs improvement
- **FCP:** 10.2 sec – Slow
- **LCP:** 25.6 sec – Very slow
- **TBT:** 200 ms
- **CLS:** 0.371 – Needs improvement
- **SEO Score:** 75/100

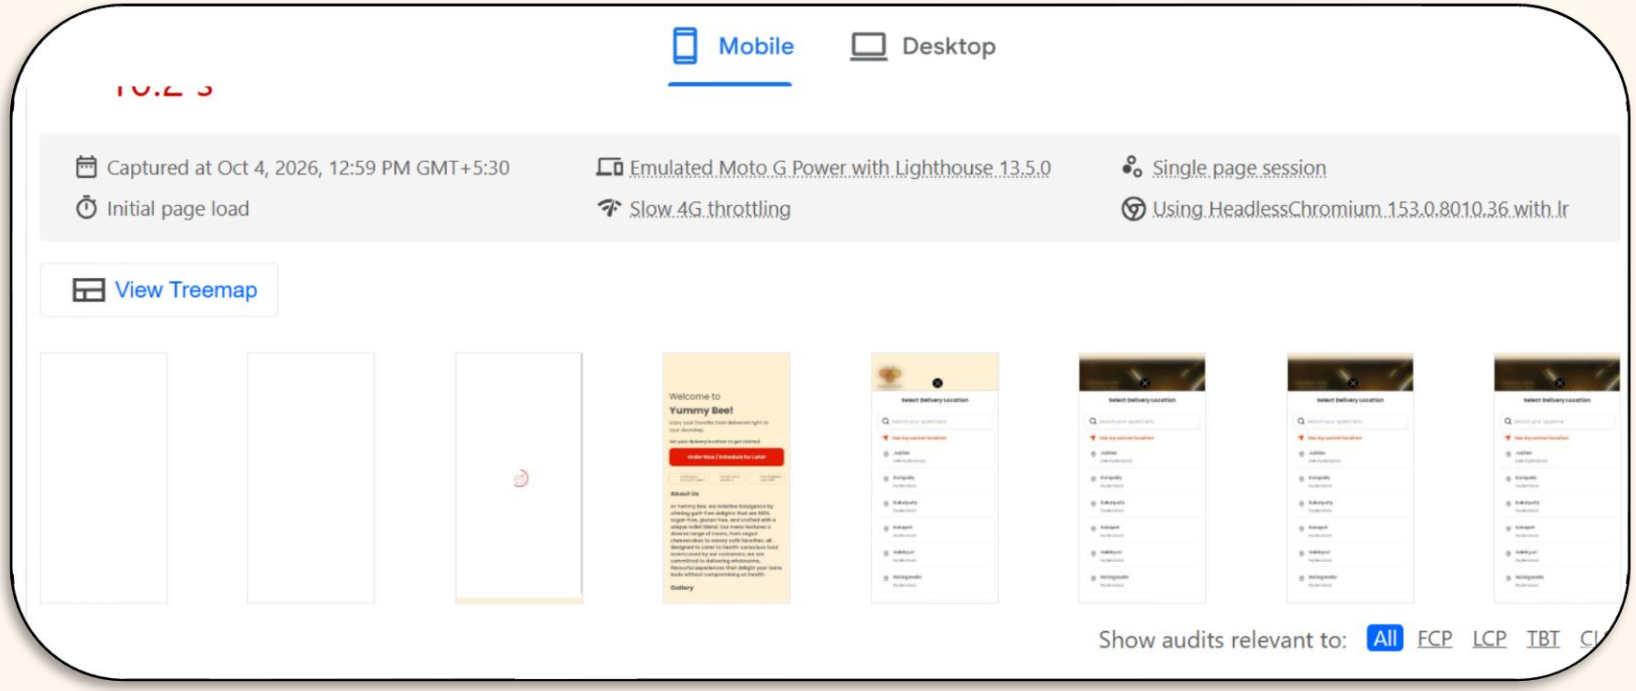

Key Insight: The mobile page has **slow loading performance**, particularly the **LCP of 25.6 seconds**, which can negatively affect user experience and SEO.

Recommendation: Optimize images, reduce JavaScript/CSS, improve server response time, and minimize layout shifts.

Test: 04 October 2026

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

Page speed check mobile [2/2]

Source: Page speed insight

- The page takes **10.2 seconds for First Contentful Paint (FCP)**.
- The loading filmstrip shows that meaningful content appears **very late**.
- This confirms a **slow initial loading experience on mobile**.

Recommendation: Optimize images, reduce render-blocking CSS/JavaScript, and improve server response time.

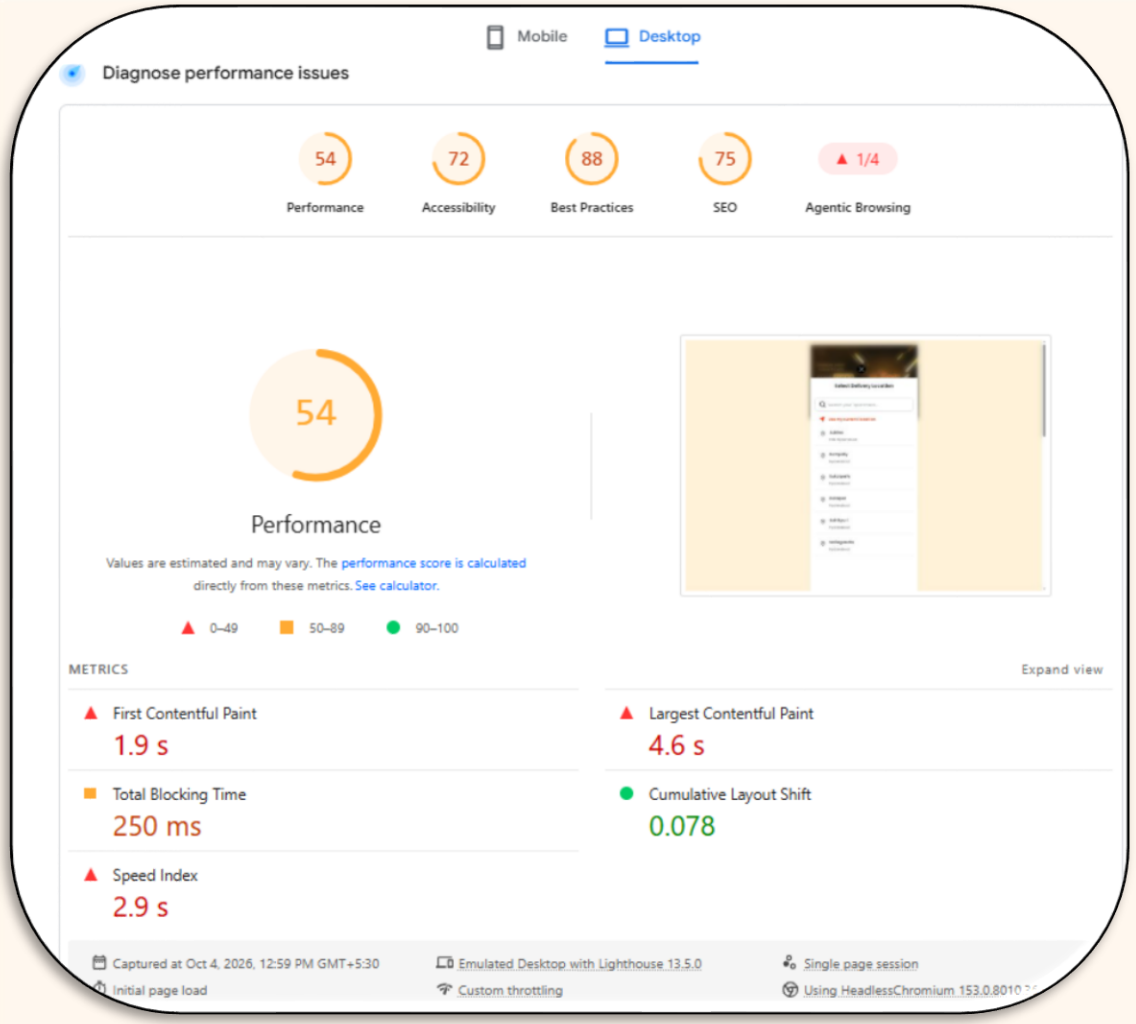

Test: 04 October 2026

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

Marketing Channels

Source: Similarweb

- **Organic Search – 38.42%** → Largest traffic source, showing strong SEO performance.
- **Direct – 22.71%** → Strong brand awareness and returning/direct visitors.
- **Paid Search – 8.39%** → Contributes a moderate share through search advertising.
- **Display – 7.26%** → Provides additional visibility through display advertising.
- **Referrals – 6.09%** → Traffic generated through external websites and partnerships
- **Organic Social – 4.41% & Paid Social – 4.14%** → Social media has comparatively lower contribution.
- **Gen AI – 2.55%** → Emerging traffic source with potential for future growth.
- **Email – 2.94% & Affiliates – 3.10%** → Smaller but useful supporting channels

Key Insight: Organic Search is the strongest acquisition channel (38.42%), followed by Direct traffic (22.71%). YummyBee should continue strengthening SEO while increasing social media, Gen AI, email and affiliate activities to diversify its traffic sources.

Test: 04 October 2026

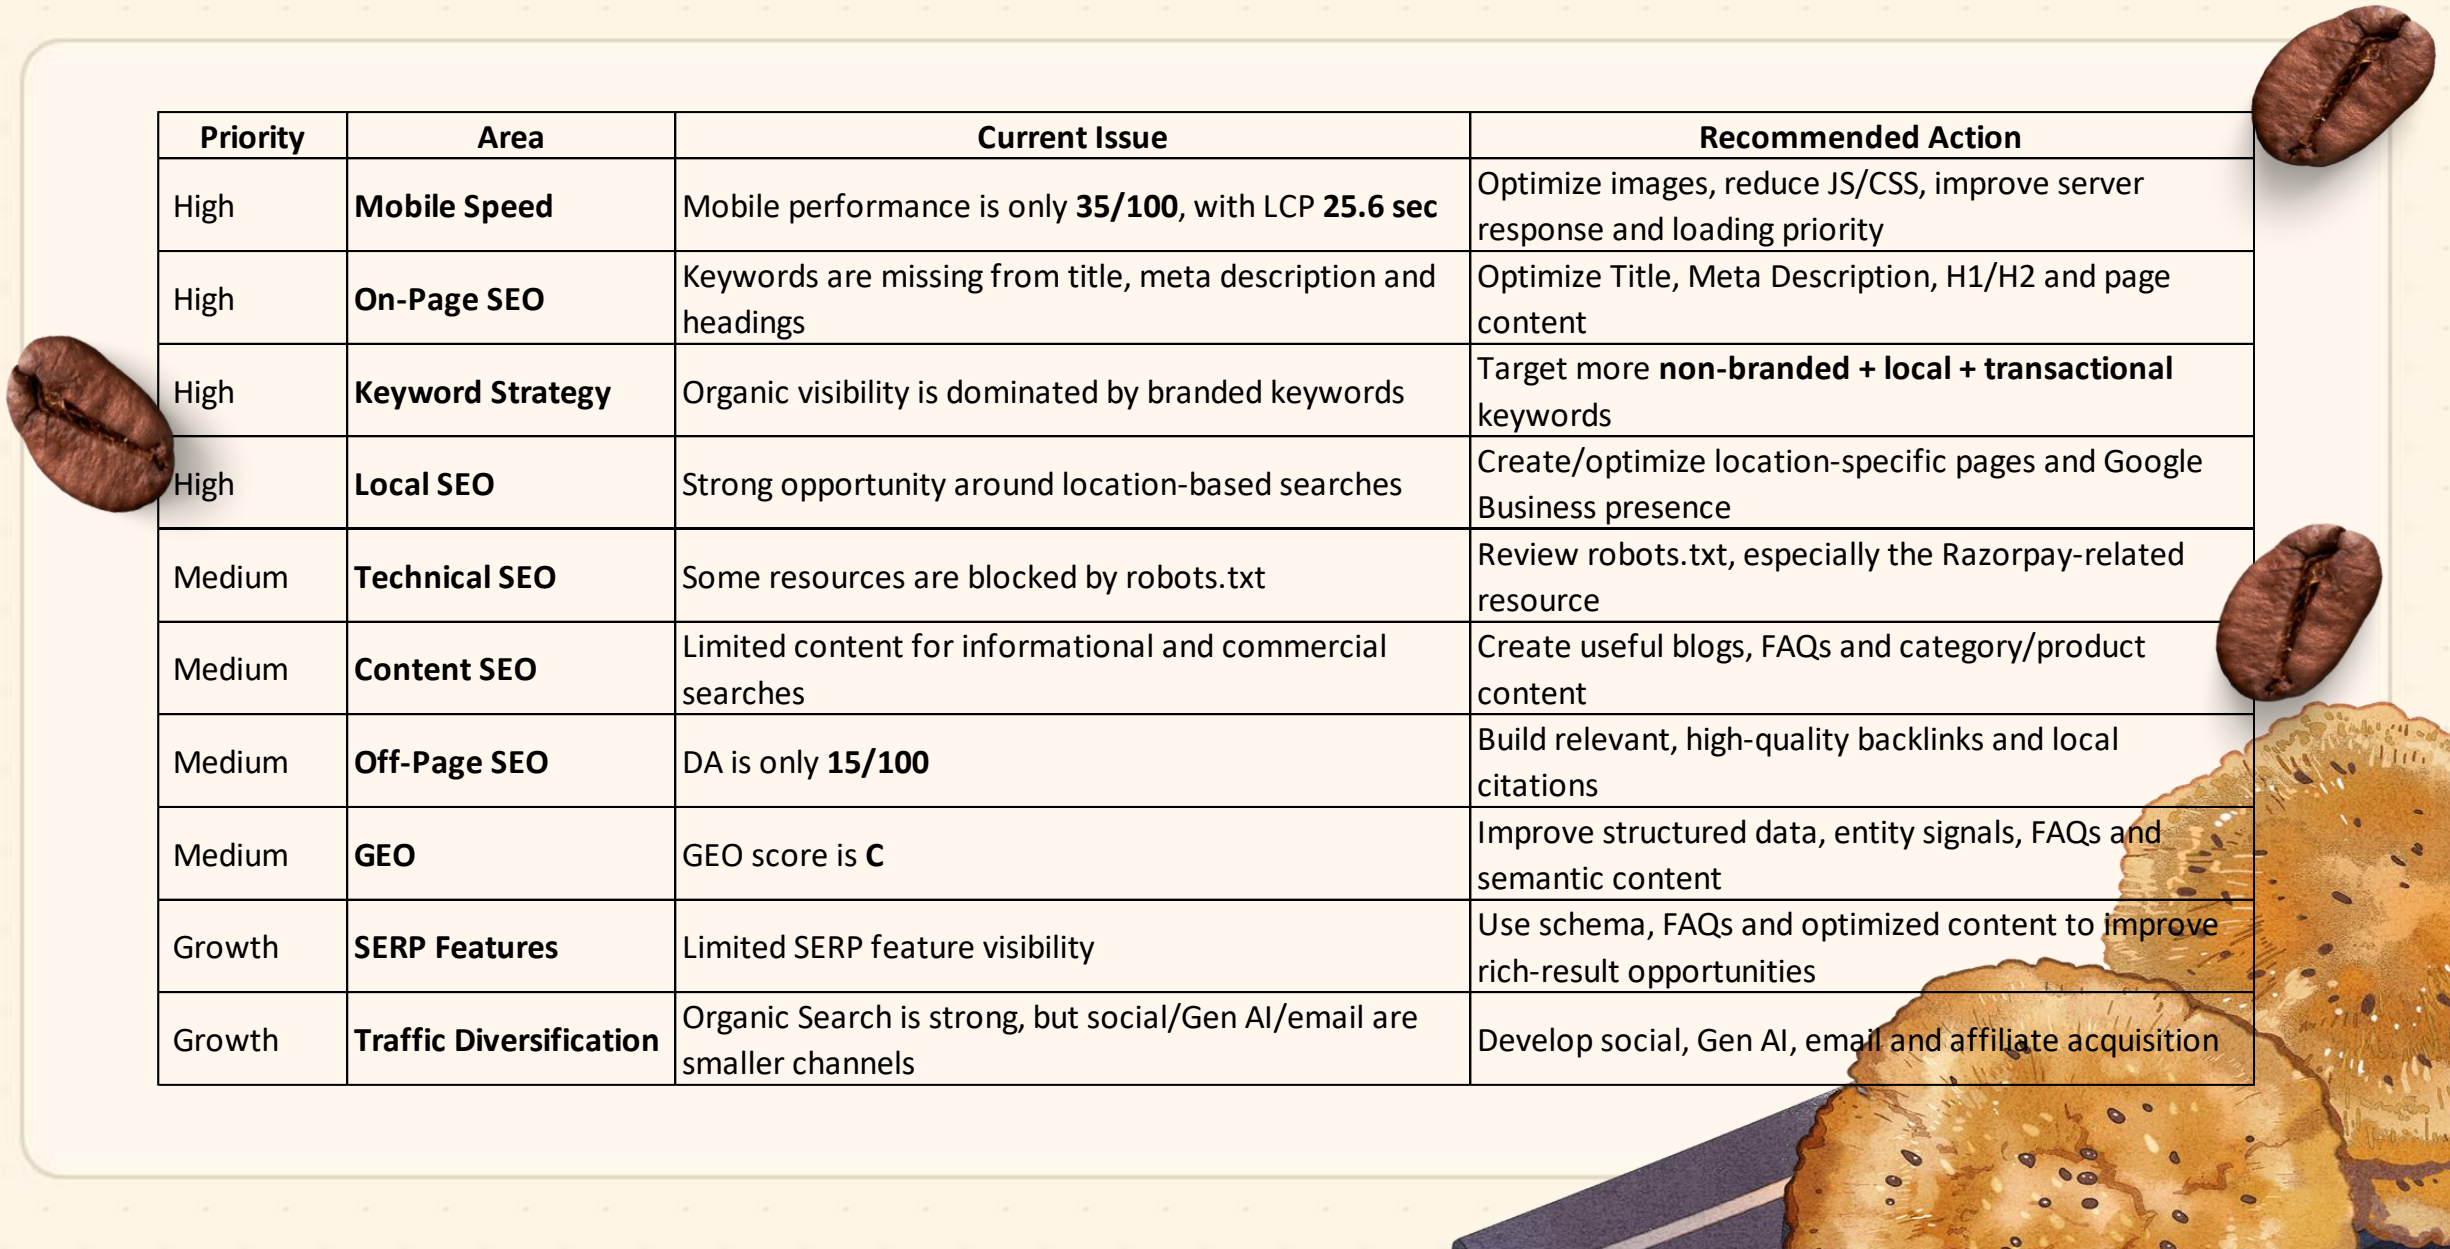

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

Improvement Recommendation

Web Skitters ACADEMY
A National Award Winning Company

Priority	Area	Current Issue	Recommended Action
High	**Mobile Speed**	Mobile performance is only **35/100**, with LCP **25.6 sec**	Optimize images, reduce JS/CSS, improve server response and loading priority
High	**On-Page SEO**	Keywords are missing from title, meta description and headings	Optimize Title, Meta Description, H1/H2 and page content
High	**Keyword Strategy**	Organic visibility is dominated by branded keywords	Target more **non-branded + local + transactional** keywords
High	**Local SEO**	Strong opportunity around location-based searches	Create/optimize location-specific pages and Google Business presence
Medium	**Technical SEO**	Some resources are blocked by robots.txt	Review robots.txt, especially the Razorpay-related resource
Medium	**Content SEO**	Limited content for informational and commercial searches	Create useful blogs, FAQs and category/product content
Medium	**Off-Page SEO**	DA is only **15/100**	Build relevant, high-quality backlinks and local citations
Medium	**GEO**	GEO score is **C**	Improve structured data, entity signals, FAQs and semantic content
Growth	**SERP Features**	Limited SERP feature visibility	Use schema, FAQs and optimized content to improve rich-result opportunities
Growth	**Traffic Diversification**	Organic Search is strong, but social/Gen AI/email are smaller channels	Develop social, Gen AI, email and affiliate acquisition

Suggestive key improvement areas

Web skitters ACADEMY
A National Award Winning Company

1. Technical SEO

- Improve mobile page speed
- Fix Core Web Vitals
- Review robots.txt
- Improve crawlability and rendering

2. On-Page SEO

- Optimize Title & Meta Description
- Improve H1/H2 structure
- Place target keywords naturally
- Improve internal linking

3. Keyword & Content Strategy

- Increase non-branded keyword targeting
- Focus on local & transactional intent
- Create SEO-focused landing pages
- Build FAQ and blog content

4. Off-Page & Local SEO

- Build quality backlinks
- Improve local citations
- Strengthen Google Business visibility
- Generate genuine customer reviews

5. GEO & AI Search

- Add structured data
- Strengthen business/entity information
- Create AI-friendly FAQs
- Improve semantic content

This directly addresses the audit's findings that branded keywords dominate, transactional/local opportunities remain, and the site needs stronger structured and AI-friendly content.

YummyBee
EAT• GUILT FREE

4 Pillars of SEO[1/2]

Web Skitters ACADEMY
A National Award Winning Company

Focus: Build relevant, useful and keyword-focused content.

Content Creation & Enhancement

Focus: Convert website visitors into customers/orders.

CRO & User Experience

Focus: Continuously measure performance and improve SEO results.

Analytics & Optimization

Focus: Improve website authority and trust.

Backlink Strategy

The audit shows that most existing visibility comes from branded keywords, while there is an opportunity to expand non-branded and transactional searches.

This is especially important because **98.47% of traffic is mobile**, while mobile performance is only **35/100** and LCP is **25.6 seconds**.

The existing audit already shows that **Organic Search contributes 38.42% of traffic**, making SEO performance an important metric to monitor continuously.

The current **DA is 15/100**, with 50 linking root domains, so authority building is an important growth area.

4 Pillars of SEO[2/2]

Web Skitters ACADEMY
A National Award Winning Company

Content Creation & Enhancement	Backlink Strategy
• Keyword-focused content	• Quality backlinks
• Local landing pages	• Local citations
• FAQs & blogs	• PR & partnerships
• On-page optimization	• Relevant websites

CRO & User Experience	Analytics & Optimization
• Mobile experience	• Keyword tracking
• Page speed	• Organic traffic
• Clear CTAs	• Conversion tracking
• Easy ordering journey	• Continuous optimization

Overall Goal: Attract → Engage → Convert → Measure → Improve

YummyBee
EAT• GUILT FREE

Improvement Recommendation

Web Skitters ACADEMY
A National Award Winning Company

Priority 1 — Fix Website Speed: Mobile performance is the biggest technical weakness: **35/100 performance, 10.2s FCP and 25.6s LCP**.

Priority 2 — Fix On-Page SEO: Optimize **Title, Meta Description, H1/H2 and keyword placement**.

Priority 3 — Expand Keyword Targeting: Move beyond branded terms like **"Yummy Bee"** and target **non-branded, local and transactional searches**.

Priority 4 — Strengthen Local SEO: Build around location-specific searches and local landing pages.

Priority 5 — Build Authority: Increase quality backlinks and relevant referring domains to improve the current low DA.

Priority 6 — Improve GEO: Use **structured data + entity information + FAQs + semantic content** to improve AI-search visibility. Your current GEO score is **C**.

Priority 7 — Diversify Acquisition: Organic Search currently contributes **38.42%**, while Gen AI is only **2.55%**, Organic Social **4.41%**, Paid Social **4.14%**, Email **2.94%**, and Affiliates **3.10%**.

Note: YummyBee should prioritize technical performance and on-page SEO first, followed by non-branded/local keyword expansion, local SEO and authority building. In parallel, improving structured content, FAQs and entity signals can strengthen its emerging GEO presence and help diversify traffic beyond branded and direct searches.

YummyBee
EAT• GUILT FREE

Target Location

Yummy Bee primarily targets **local customers in Hyderabad and Secunderabad**, especially areas where it has outlets and delivery demand.

Key Target Locations:

- **Kondapur**
- **Jubilee Hills**
- **Manikonda**
- **Sainikpuri / Secunderabad**
- **Gachibowli**
- **Banjara Hills**

These locations are supported by Yummy Bee outlet listings and local search presence.

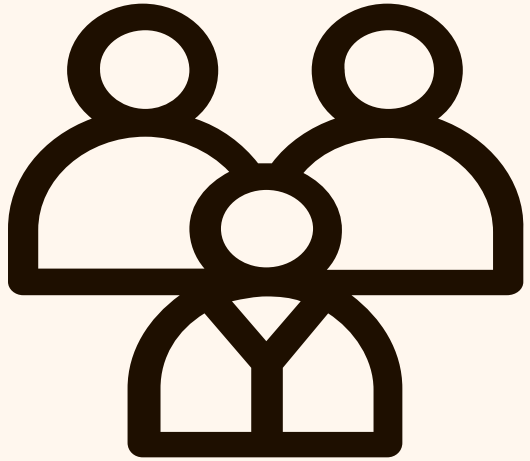

Yummy Bee's primary geographical target is **Hyderabad and Secunderabad**, with a strong focus on local areas such as Kondapur, Jubilee Hills, Manikonda and Sainikpuri. The SEO strategy should prioritize **location-based keywords** to capture nearby customers searching for cafes, desserts, cakes and food delivery.

YummyBee
EAT• GUILT FREE

Target Location Expansion Strategy

Web Skitters ACADEMY
A National Award Winning Company

What YummyBee is doing?
Currently building a strong presence across **Hyderabad & Secunderabad**.
Existing locations include **Kondapur, Jubilee Hills, Khajaguda, Kokapet, Kukatpally and Sainikpuri**.
The brand has previously announced plans to expand beyond Hyderabad into **Bengaluru and Mumbai**.
Focuses on health-conscious positioning: **sugar-free, maida/gluten-free and preservative-free** products.

What can be improved?
Strengthen **hyperlocal SEO** for each outlet: *“healthy cafe in Kondapur”, “sugar-free cakes in Jubilee Hills”*, etc.
Expand strategically into high-demand urban locations before entering new cities.
Create dedicated landing pages for each location.
Use Google Business Profile, local backlinks, reviews and location-based social media campaigns.
Prioritize **Bengaluru → Mumbai → other Tier-1 cities** after strengthening Hyderabad operations.

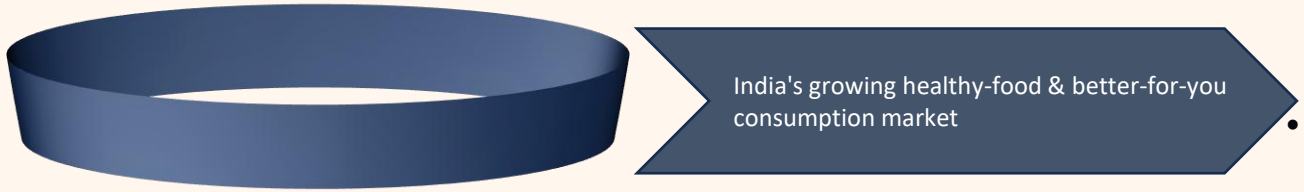

Key Insight: YummyBee already follows a cluster-based expansion strategy in Hyderabad; the next step should be stronger hyperlocal marketing and a data-driven expansion into other Tier-1 cities.

Total addressable market (Funnel)

Web Skitters ACADEMY
A National Award Winning Company

TAM – Total Addressable Market

- India's broader **healthy-food market** provides the largest opportunity.
- One 2026 market estimate values India's healthy-food market at **US$25.8 billion in 2025**, projected to reach US$59.8 billion by 2034.
- This includes many healthy-food categories, so it should be treated as YummyBee's **broad TAM**, not its exact cafe market.

SAM – Serviceable Available Market

- **Hyderabad & Secunderabad**
- Urban, health-conscious consumers
- Cafe, dessert, bakery and healthy-food customers
- Customers within practical delivery/outlet catchment areas
- Online food-ordering customers

SOM – Serviceable Obtainable Market

- Customers around existing outlets
- Repeat customers
- Local Google searches
- Direct website orders
- Swiggy/Zomato customers
- Social-media-driven customers
- Corporate and event orders

EAT• GUILT FREE

Target Audience

1. Demographic
- Age: **18–40 years**
- Students, working professionals and young families
- Middle to upper-middle income groups

2. Geographic
- Primary: **Hyderabad & Secunderabad**
- Focus on customers around YummyBee's existing outlets and delivery areas

3. Psychographic
- Health-conscious
- Fitness & wellness focused
- Prefer healthier alternatives
- Want **guilt-free indulgence without compromising taste**

4. Behavioural
- Online food-ordering users
- Frequent cafe/dessert customers
- Search for healthy, sugar-free or gluten/maida-free options
- Respond to offers, reviews and social-media recommendations

Urban, health-conscious young consumers aged 18–40 who want convenient, tasty and healthier food/dessert options and are comfortable ordering online.

Competitor Analysis – Nourish You

Nourish You's competitive research report shows a Domain Trust score of 56/100, 58 organic keywords, estimated organic traffic of 19 clicks per month, 183 referring domains, and 310 backlinks. Although the website has an established backlink profile, only 13.79% of its tracked organic keywords rank in the top 10 positions. The analysis highlights opportunities to improve keyword rankings, expand non-branded organic visibility, and attract users with commercial and transactional search intent. YummyBee can apply these insights by strengthening local SEO, targeting high-intent food delivery keywords, improving technical SEO, publishing relevant content, and building quality backlinks.

However, Nourish You primarily sells packaged health foods and plant-based products, while YummyBee operates a food-ordering and delivery platform. Therefore, Nourish You is more suitable as an SEO benchmarking or indirect competitor than as a confirmed direct competitor.

Competitor Analysis 3: The Cinnamon Kitchen[2/3]

Competitor strengths and weaknesses	
Area	**Analysis**
Domain Trust	55/100, according to the tool.
Organic visibility	198 tracked keywords and estimated traffic of 4.7K clicks/month.
Ranking distribution	52.45% of tracked keywords rank in the top 10.
Content strategy	Product and category pages target vegan, gluten-free, and refined-sugar-free foods.
Local visibility	Local Pack and Google Business Profile features appear in the report.
Backlink profile	105 referring domains and 172 backlinks.
Paid search	Eight tracked paid keywords and estimated traffic of 931 clicks/month.

SERP features analysis

- Image results: 8 keywords.
- Sitelinks: 7 keywords.
- Local Pack: 3 keywords.
- Google Business Profile (GBP): 3 keywords.
- Reviews: 3 keywords.

Paid search analysis

The paid-search screenshots show eight paid keywords, estimated traffic of 931 clicks per month, and an estimated traffic cost of $49.50.
The report also shows 75% of paid keyword rankings in positions 1–2 and 25% in positions 9–11.
This suggests that the tool estimates paid visibility for a small set of keywords, including brand-related searches. It does not confirm the competitor's actual advertising budget, campaign profitability, or conversion rate.
For YummyBee, paid search could be tested for high-intent menu and delivery keywords, with performance evaluated through cost per order and return on ad spend.

YummyBee
EAT• GUILT FREE

Competitor Analysis 3: The Cinnamon Kitchen[3/3]

Web Skitters ACADEMY
A National Award Winning Company

Competitor Analysis – The Cinnamon Kitchen

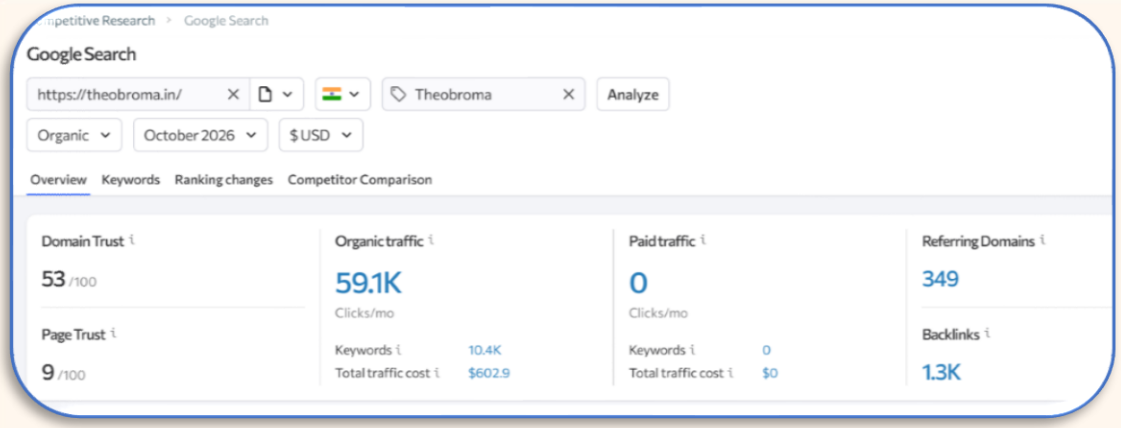

The Cinnamon Kitchen's competitive research report shows a Domain Trust score of 55/100, Page Trust of 17/100, 198 tracked organic keywords, estimated organic traffic of 4.7K clicks per month, 105 referring domains, and 172 backlinks. Approximately 52.45% of its tracked organic keywords rank in the top 10 positions, indicating strong estimated first-page visibility.

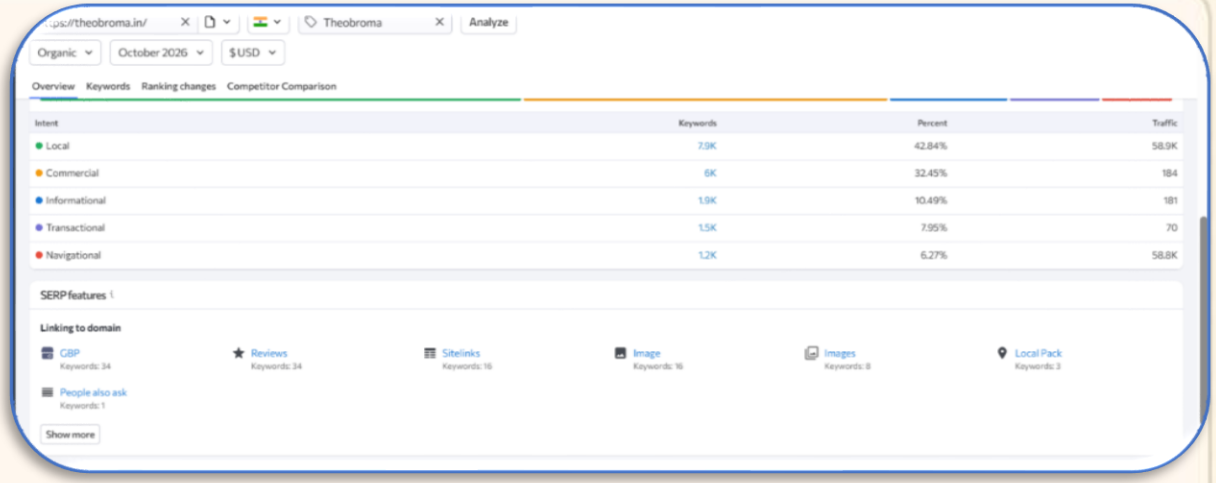

Its SEO strategy includes product-specific landing pages, brand-related keywords, local search visibility, and content targeting vegan, gluten-free, and refined-sugar-free products. The report also indicates estimated paid traffic of 931 clicks per month. YummyBee can learn from this approach by strengthening local SEO, optimizing menu pages, targeting relevant high-intent keywords, improving mobile ordering, and building quality backlinks. The Cinnamon Kitchen is a useful food-sector SEO benchmark, although its specialized bakery and packaged-snack business differs from YummyBee's food-ordering model.

YummyBee

Competitor SEO Analysis 4: Theobroma[1/2]

Web skitters ACADEMY
A National Award Winning Company

Source: SE Ranking

YummyBee
EAT• GUILT FREE

Competitor SEO Analysis 4: Theobroma[2/2]

Web Skitters ACADEMY
A National Award Winning Company

Competitor Analysis: Theobroma

Theobroma demonstrates strong organic search performance, with an estimated 59.1K monthly organic clicks, 10.4K ranking keywords, 349 referring domains, and 1.3K backlinks in the October 2026 SE Ranking report. Its strong branded keyword rankings, local search visibility, and broad product-category coverage provide useful benchmarks for YummyBee. The analysis also identifies potential opportunities around product-related and location-based keywords that do not rank in the top 10. YummyBee can strengthen its SEO strategy by optimizing product pages, targeting relevant local and transactional keywords, improving its local search presence, publishing useful content, and building high-quality backlinks.

Key takeaway: YummyBee should use Theobroma as an SEO benchmark and focus on winning relevant local and product-specific searches within its own service area rather than competing directly for Theobroma's branded keywords.

Digital strategy and roadmap[1/2]

Web Skitters ACADEMY
A National Award Winning Company

Phase 1 — Technical SEO & Website Optimization

- Improve mobile page speed and Core Web Vitals.
- Optimize title tags, meta descriptions, and H1/H2 headings.
- Review robots.txt, crawlability, and indexability.
- Improve product pages, navigation, and online ordering experience.
- Set up baseline tracking through GA4 and Google Search Console.

Goal: Establish a technically sound website and improve the mobile experience.

Phase 2 — Content, Local SEO & Brand Visibility

- Target non-branded, commercial, and transactional keywords.
- Create location-specific landing pages for Hyderabad and Secunderabad service areas.
- Publish SEO-friendly blogs about healthy food, cakes, desserts, and meal options.
- Optimize Google Business Profiles and encourage genuine customer reviews.
- Strengthen internal linking and build relevant, quality backlinks.

Goal: Increase relevant organic visibility and attract customers searching for nearby food options.

YummyBee
EAT• GUILT FREE

Digital strategy and roadmap [2/2]

Phase 3 — Paid Campaigns, Conversion & Retention

- Test Google Search Ads for high-intent food and cake delivery searches.
- Use Meta Ads and Demand Gen creatives for product discovery and remarketing where eligible.
- Run email and WhatsApp promotions with customer consent.
- Improve landing pages, calls to action, and checkout flow.
- Review campaign costs, orders, conversions, and repeat purchases.

Goal: Convert qualified traffic into orders and build customer loyalty.

Phase 1	Phase 2	Phase 3
Days 1–30	Days 31–60	Days 61–90

Landing page structure

Element	Objective
Header & Navigation	Logo | Menu | Cakes | Healthy Food | About Us | Contact
Hero Section	A clear headline, appetizing product image, short value proposition, and prominent “Order Now” CTA.
Featured Products	Use product image
Unique Selling Proposi	Highlight available sugar-free, gluten-free, maida-free, and preservative-free options using accurate product-specific claims.
Customer Reviews & T	Genuine customer testimonials, ratings, ingredient information, and clear delivery details.
Location & Delivery	Delivery location selector, service availability, estimated delivery information, and ordering instructions.
Footer	Contact information | Store locations | FAQs | Policies | Social media links

Ad or Google Search → Landing Page → Explore Menu → Select Delivery Location

Element	Recommended improvement	Objective
Headline	Communicate YummyBee's food and dessert offering clearly	Capture attention
CTA	Use prominent “Order Now” and “Explore Menu” links	Increase clicks
Product section	Feature relevant products with clear names, prices, and images	Encourage product discovery
Trust signals	Display genuine reviews and accurate ingredient information	Build customer confidence
Location selector	Make delivery availability easy to check	Reduce ordering friction
Mobile design	Improve loading speed, readability, and touch controls	Improve mobile experience
SEO elements	Optimize title, meta description, headings, and internal links	Improve organic visibility
Conversion tracking	Track product views, add-to-cart actions, checkout, and purchases	Measure performance

YummyBee

EAT• GUILT FREE

“KPI analysis”

YummyBee
EAT• GUILT FREE

KPI used in Journey

Web skitters ACADEMY
A National Award Winning Company

Customer Journey Stage	Category	Key Performance Indicators (KPIs)	Purpose
Awareness	Marketing & Reach	Reach, Impressions, Website Traffic, Brand Search Volume	Measure brand visibility and audience reach
Interest	Engagement	CTR, Social Media Engagement Rate, Pages per Session, Time on Site	Measure audience interest in YummyBee
Consideration	Purchase Intent	Menu Views, Product Page Views, Add-to-Cart Rate, Customer Reviews	Track product evaluation and purchase intent
Purchase	Conversion & Sales	Conversion Rate, Number of Orders, Cost per Acquisition (CPA), Revenue, Average Order Value (AOV)	Measure sales and advertising effectiveness
Delivery & Fulfillm	Operations & Customer Ex	On-Time Delivery Rate, Average Delivery Time, Order Fulfillment Rate, Order Accuracy Rate, Cancellation Rate	Measure delivery efficiency and order satisfaction
Retention	Loyalty & Customer Value	Repeat Purchase Rate, Customer Retention Rate, Purchase Frequency, Customer Lifetime Value (CLV)	Measure customer loyalty and repeat business
Advocacy	Reputation & Referrals	Referral Rate, Customer Review Ratings, User-Generated Content, Net Promoter Score (NPS)	Measure customer satisfaction and recommendations

YummyBee should monitor KPIs across the complete customer journey—from brand awareness and purchase intent to delivery performance, repeat orders, and customer advocacy—to improve conversions and long-term customer loyalty.

Suggested tools: Google Analytics 4, Google Search Console, Google Ads, Meta Business Suite, customer feedback surveys, and YummyBee's order-management system.

Note: These are recommended KPIs; actual performance values need to be collected from YummyBee's analytics, order, and delivery data.

Accountability

webskitters ACADEMY
A National Award Winning Company

Digital Marketing Team Accountability:

- Clear Roles & Responsibilities: Assign tasks across SEO, social media, PPC and content marketing.
- Defined Goals & KPIs: Set measurable targets for traffic, rankings, engagement and conversions.
- Weekly Progress Reports: Track completed tasks, pending work and campaign performance.
- Monthly Performance Reviews: Evaluate results and identify areas for improvement.
- Deadline & Budget Management: Ensure timely execution and efficient resource utilization.
- Customer Feedback & Adaptation: Use customer reviews and feedback to improve marketing strategies.
- Ethical Marketing Practices: Maintain accurate communication, brand consistency and responsible advertising.

Key Objective: Improve campaign performance, team efficiency and customer satisfaction through regular monitoring and accountability.

YummyBee

Activities

Activities – YummyBee Digital Marketing

- SEO & Keyword Research: Conduct keyword research, optimize website pages, improve local SEO and monitor organic rankings.
- Google Ads Campaigns: Run search, display, video and Demand Gen campaigns to increase brand awareness and online orders.
- Social Media Marketing: Create and publish engaging content on Instagram, Facebook and other relevant platforms.
- Content Marketing: Develop SEO-friendly blogs, product descriptions, healthy-food content and location-based landing pages.
- Competitor Analysis: Analyze competitors such as Theobroma and Cinnamon Kitchen to identify market opportunities.
- Website Optimization: Improve mobile page speed, Core Web Vitals, user experience and conversion paths.
- Local SEO Management: Optimize Google Business Profiles, collect customer reviews and target local food-related searches.
- Email & WhatsApp Marketing: Share offers, new products and personalized promotions with opted-in customers.
- Performance Analytics: Track traffic, CTR, conversion rate, advertising costs, online orders and repeat purchases.
- Customer Retention: Introduce loyalty campaigns, referral offers and remarketing strategies to encourage repeat orders.

Thank You!
